Subject: Turley

To whom it may concern,

Actually it concerns all of us! It just baffles my mind that the county considers this Steve Turley development too dangerous to approve so he decides to do an end around with our city officials to get his approval. How can the mayor and city council members turn a blind eye to the people that live below this project and the people that move into this potential fire trap? My wife and I have had numerous conversations with Mr. Turley and we found him to be a very personable guy only to find out later he was lying to us the whole time! If he can lie to us don't think that he won't lie to you.

My family has owned land in Alpine for many decades and there was always the talk that Alpine will someday be another Jackson. I always believed in the potential this town has until recently. I feel the people in power have only one thing in mind and that is greed! I am now convinced Alpine will never be another Jackson!

I hope that when you make your decision it is within the best interest of the citizens and the town of Alpine.

Respectfully Dan and Robyn Stoor
