

Public Works Director Report 12/02/2025

Craig Leseberg

Radio Read meter project, we are currently down to around 30 meters left to install. We hope to have all meters switched out by the first of the year. We are finding some continuous flows at a handful of properties. Melody has sent out letters notifying customers of the potential issues. Most of the time it's a running toilet.

December 10 there is a public hearing on the Mega well tie in, inside the council chambers at 4 p.m. Larry and Lonnie will be putting that meeting on for the water development office. I also will be in attendance.

Public works crew is gearing up for what looks like our first plowable snow coming Friday so they have been getting geared up for snow removal season.

That is all for now kind of a light update.
