### Terms and Conditions

- Commercial, industrial, or agricultural business must be served by Lower Valley Energy (LVE).
- This program is for existing facilities/retrofits and new construction.
- Must be a minimum of 25% kWh savings.
- Project cost benefit ratio must be greater than 0.5.
- Pre-inspection and pre-approval by LVE with a "Notice to Proceed" is required prior to equipment installation.
- Members are to capture project data in a lighting calculator and submit it to LVE for review and approval. LVE Lighting Calculator Version 6.0 is required.
- All lighting products must be on Qualified Product Lists or be approved by LVE and/or Bonneville Power Administration (BPA). Specification Sheets proving EnergyStar or DLC Listing are required.  
Qualified Product Lists can be found:  
<http://www.energystar.gov/productfinder/product/certified-light-fixtures/results>  
<http://www.designlights.org/QPL>
- Any proposed LED products which do not meet the BPA guidelines for wattage reduction, or are not listed on a Qualified Product List, may still be eligible as a non-standard measure and must be pre-approved by BPA.
- All program requirements must be followed, including but not limited to proper disposal of fixtures, ballasts, and lamps.
- If a project consists of more than just bulb replacement, an electrical permit is required by your local authority.
- A post-inspection will be performed on the building by LVE to verify actual equipment installed with validated counts.
- Project invoice(s) documenting site address and total project cost including cost incurred from equipment, labor, permits and disposal fees will be provided to LVE prior to payment.
- All lighting projects must be completed within 180 days from the Approval date listed on the "Notice to Proceed".
