

3. Allow this area to regrow naturally. Remove exotic plant species as needed. This reduces mowing and adds to natural habitat.

4. Allow this area to regrow naturally along existing berm. Remove exotic plant species as needed. This adds to natural habitat and screens homes & structures from park view.

Continue to keep ditch clear for pumping water

1. Allow existing growth under large trees to remain, remove exotic plant species as needed.

2. Allow area between large trees to regrow naturally, remove exotic plant species as needed. This will connect areas around trees to form one larger natural area.
