What experience, knowledge and insight in the LLD and/or Civic Participation can you provide to the Commission?

I have supported & served the LLD committee since 2022, working with landscape maintenance management and historical site restoration. I wrote the RFP for our landscape contractor hiring and participated in search, interviews, hiring and supervision.

My background in landscaping began in college, where I worked as a landscape laborer, and subsequently established my own landscape maintenance and design business. I obtained my CA contractor license (C27).

I am dedicated to serving our community and last year co-founded our Angels Firewise Community.

From a LLD aspect, what three things do you believe the City is doing well?

- 1) Assistance with financial services is excellent
I am passionate about paying our contractors on time!
- 2) Assistance from Public Works is excellent
- 3) Assistance from Code Enforcement (weed abatement and defensible space clearing and cleanup) is excellent!

From a LLD aspect, what three areas does the City need to improve on the most?

1) Help manage "nuisance tree" problem (poplars),
