

Public Works Monthly Report

February was another warm month. We took the opportunity to deal with the dump and got the pile pushed back. There were also the trash baskets we dealt with, with plans on dealing with the high school soon. TKC rented a port-a-potty, as well as a few individuals who rented trailers as well. Tom from Knik gave the shop a forced air heater hat we stored as well. I took a test with my results yet to be graded. They send the tests to Juneau to get graded in batches. We cleared up a walkway and organized the fire station, ready for any further steps.
