

# Aniak City Council Progress Report

Clear Summary of Current Projects and Partnerships

<b>Project</b>	<b>Status &amp; Updates</b>
<b>Landfill &amp; Burn Cage</b>	We are working with the Tribe and Public Works to design a safe landfill. Planning for a new burn cage is in progress to improve how we handle waste.
<b>School Safety</b>	Lenore and I met with the school to discuss building safety and how to evacuate students if needed. New emergency plans and regular drills are in place.
<b>Fire Station</b>	Efforts continue to recruit and train volunteers so we can respond quickly to emergencies.
<b>Shooting Range</b>	The city owns the shooting range. We are waiting for disaster relief feedback to help us plan improvements for the next meeting.
<b>Levee Project</b>	We are currently in the planning and approval process for the levee project. Variance notices for landowners are being prepared, and we are addressing survey concerns before construction can begin.
<b>Road Grader Grant</b>	We have been approved for a grant and are working through the process. The new grader will help us keep city roads in good shape.
<b>Nissan Engine Replacement</b>	The new engine has arrived. Public Works and I will install it next month.
<b>Teamwork &amp; Recognition</b>	I want to thank Lenore, Charlotte, council members, and the Tribe for their support and guidance. Working together is making progress possible.

**My Commitment:** I am dedicated to serving Aniak. Together, we are building a safer and stronger community.
