

Leon L. Kiana
Manager's Report
October 2023

The past two month has been busy months. With the pending CDBG application to build the Elder/Library facility. We can only apply for up to \$850,000.00 and when the project is complete, it must be occupiable. Because of this, I have been working with Architects Alaska to pare down the design to a smaller project such as putting up the foundation and just adding the Elder portion of the project and making that section occupiable. We would the apply for another CDBG grant to complete the Library section.

In the meantime, moving the Library to the vacated rental unit or the City Office might be an alternative to building a new facility at this time.

I still plan on having FEMA representative to give an overview of their Flood Insurance program in November, hopefully in person.
