SELECT PRIORITY #1.

Copy

Please select the project you support the most, ranked Priority Order #1. If an idea you support is not listed here you may select "Other" and then you can enter text to explain your project idea later in Survey Question #6. You do not have to select an option every time, if you only support one option you can just fill in Priority one. If you only support two options, just complete Priority one and two, etc.

PLEASE ONLY SELECT ONE BOX ON EACH QUESTION.

Summary:

Priority #1 – Renovate Campsite A Bathroom with Shower House and Flushing Toilets

Priority #2 – Full Hook Up Camping Sites

Priority #3 – Tree Planting and Landscaping

Priority #4 – Extend Walking Trail Around the Lake

Other Priorities:

Improve campsite C playground

Smooth roads around the lake.

BOAT RAMP REPAIR

Repair dam and spillway

Have the shower/bathroom combo. Make at least 2-3 for men's & womens.

Mow the disc golf course more often

Build up the area around camp site A on the west side to prevent flooding where people like to park. Also possibly paving the entire area around camp site A starting where it is paved already.

Pave all roads surrounding the lake. Or at least rock them.

Need to fix the water hookups we have and please add more of them. The dump station is not user friendly at all. The drain is higher than the drive. Needs dugout or rearranged to people can use it !

Replace boat ramp and relocate to the north east away from main portion of the lake and wake zone.

Dredge the lake

Boat ramp updated and dock. Possibly add in a second boat ramp on the other side of the lake.

Continue the dredging project

Proper dog park

Gravel the approaches and RV parking pads. The camping areas are rutted and look horrible every time it rains. This would do much to make the area more attractive, and would be relatively inexpensive to achieve.

Public docks

Trees around lake shore would provide shade on hot days, would be able to stay out longer on hot days. Also would help with erosion.

Events to draw out of towners

Trails/Track for 4 - Wheelers / Dirt Bikes

Update the swimming area!

Dredge the lake and clean debris from the bottom.

Take out railroad ties and rebar from the camp pads. Rock only.

Make more camping areas, or places tents can camp with at least water.

Fixing the boat ramp!

Improve the disc golf course. I travel down there to play about 10x's a year. I would camp there more often if bathrooms/shower facilities were better

Repair dam

Stock lake with fish

Dredge the lake, pretty please.

Dredging the lake

Long term plan for dredging and dam repair

First of all this is not a county lake and it should read are you a resident of Anthony, the city water rate payers pay for the lake not the county.

We need to give the Anthony Residents a break on camping rates since they already pay for the majority of the lake through water rates with no more benefit than any one else that doesn't have to pay for the up keep.

Dredge out the lake to make it deeper

Small cabins that could be rented out year around

Rentable cabins around lake

Boat ramp needs to be bigger

Playground equipment

Full Hook Ups on West Side

Archery Range for youth to use

First prioritized project I believe should be a renovation of the boat ramp with this lake only having one ramp to begin with it should be fit to have trailers backed on and off of. At the end of 2023 summer the ramp was in poor shape giving way on the north side and starting to sink along with break out. As the winter months have come with freezing water it has continued to decline and will not be usable by summer.

Clean up dead tree branches near the water edge. And places where needed to be picked up.

We need more water hookups.

The mowing needs kept up better, the entertainment needs to taken care of. We have a disc golf course that's nice and the volley ball courts have stickers and horse shoe boxes needs redone and the kids playground needs cleaned up.

Additional water hookups for Campsite C and a working bathhouse for campsite C.

The disc golf course needs new tee pads, especially on Holes 6 and 17. Tee pads for 10 and 12 could also be upgraded as they are cracked and showing wear. Other improvements to the disc golf course would be installation of alternate basket locations(ground anchors for the baskets). Some of these were destroyed when the oil company drained the lake and used the water for fracking and they never got replaced. Trees also need to be planted as many of the holes are wide open and boring. Adding trees would make the course more challenging and would benefit the environment as well as add to an otherwise bland landscape.

Dredge the lake to make for better fishing and increase fish habitat

Join the walking path to Anthony

More outdoor sporting

Mow the primitive camping areas as much as the others. There was a lot of time that we wanted to camp, but campsite D grass was too tall.

Disc golf course upgrades: tree plantings, tee pad maintenance, and a professionally made sign at the start of the course. Could even use road signs by the entrance lake roads that say "Disc Golf -->" (these are more effective than you would think) to advertise that there is a course nearby.

Shower houses with running cold and hot water so ppl are able to stay clean out there

Clean the lake out. Get it dredged

Clean the lake up itself.

A sewage dump for RVs.

Dredge the lake; fix the dam

Pave/redo the roads around the lake/update playground on west side by golf course

1. Dredge the lake 2. Fix the dam

A hiking trail

Reduction of silt washing into the lake, dredging, more rocks on bankline and improved fish habitat.

Improve fishing numbers blue gill, crappie etc

Road pavement extended to the golf course

The lake need more capacity a.k.a. dredged out that will allow for more fish habitat, and better boating experience.

Move and fix the boat ramp/dredge the lake

Bug Sculptures ie. Water Bugs

The roads on the west side are terrible and poorly maintained.

Boat ramp

Pave road to golf course, while doing it widen curve also.

Boat ramp is crap, and tried of camping in water holes

Fix boat ramp

Dredge

Need to level out a couple of the camp sites on the west side of the lake, fix and make a double boat ramp so it makes it faster to load and unload, add moss or something in the lake to make it cleaner.

Improvements to dog park area. Lots of stickers in the grass

PAVE THE ROADS AROUND LAKE!!

Dredge it

Make the lake more of a priority than the golf course

A better beach

Dig out lake and put in a dock

pave road around lake

Perhaps add a basketball area

Allowing campers to primitive camp . The lake has installed a wonderful dump station with a fill station. Allow those who wish to use their campers in areas around the lake that are considered primitive.

Dredge the lake. Make it better for watercraft.

Dredge the lake!

Pave roads around lake

Suspended Pathway above the lake- call it the anthony aquavista walk maybe or something catchy. Imagine a transparent, floating skywalk or suspended pathway that hovers above the lake, providing visitors with a breathtaking and surreal experience. This transparent walkway could be supported by cables or other innovative engineering solutions, allowing people to feel like they are walking on water. transparent flooring and sides Install LED lighting along the pathway Integrate interactive elements along the skywalk, such as weatherproof augmented reality displays providing information about the lake's ecosystem, history, and wildlife. Include educational stations with fun facts, trivia, and interactive displays about the lake , Anthony Ks and Harper county:) Ensure the skywalk is designed to be accessible to people of all abilities, including those with mobility challenges The Anthony AquaVista Walk, with its unique transparent

design and breathtaking views of Anthony Lake, could promise an unparalleled experience, positioning Anthony as a must-visit destination for adventure seekers, nature enthusiasts, and those seeking a novel outdoor adventure. or Host floating movie nights on a large screen set up on the water, creating a unique and memorable family entertainment experiences I think something like the aquavista would get a lot of business to Anthony and harper county from all around the USA and possibly world.

Fix boat ramp, making it wide enough to handle launching 2 boats at a time.

Storm shelter

Cleaner water

Make a few campsites with concrete slabs.

Cameras , security. Tornado shelters
