

# **Anthony Industrial/Economic Development Board Utility Rebate Program**

This program is made available to new business and industry that opens within the jurisdiction of the City of Anthony utility services. The following outlines how the program works and how the rebate is given.

Year 1: 30% or \$300 (per month whichever is less)

Year 2: 20% or \$200 (per month whichever is less)

Year 3: 10% or \$100 (per month whichever is less)

Starting with year 1, a business with a monthly bill of \$250 would get 30% (\$75), a monthly bill of \$700 would receive 30% (\$210), and a bill of \$1150 would receive \$300.

This rebate is intended to be used on the total utility bill usage fees only. The rebate will not be used on late/delinquent fees. The business must have the meters changed to the name of the business and or the tenant. Bills that are in the name of the building owner in the case of a rent/lease will not qualify for the rebate. The rebate for said business will start at the first billing cycle after the approval of the recommendation from the Industrial/Economic Board by the City of Anthony Commission and remain in effect for a period of 3 years (36 months). In the case that the business ceases operation and becomes defunct prior to the end of the 36th month the rebate will end with the next immediate bill. There is not an option for transfer of ownership for this rebate program.
