

Good evening ladies and Gentlemen of the City of Anthony. I, Richard Martin of 124 N 5th Ave. Anthony. Am requesting an ADA compliant ramp on the North Side of my house at the end of the sidewalk going out onto Steadman St. I would like the West side of the ramp to start at the West side of the existing Sidewalk extending East to the to the compliant width where ever that ends up at.

The reason for this request is My 79 Year old mother, who is on a rollator walker, and can barely walk, goes across to visit my step dad at the nursing home directly across the street to the north. Where there is an ada compliant ramp going back up the other side to the nursing home. It would be of great help to all of us to have that done. She currently has to walk all the way down to the front driveway on 5th st. to get out into the street and walk North to cross Steadman st. and enter the sidewalk to go to the front door of the Nursing Home. It would me of great help if we could get a curb cut and make it where she can simply cross to the nursing home.

We also go over and get my stepdad who is wheelchair bound and roll him across to our house for family gatherings. We usually roll him out the South Door of the Nursing home and have to go out to Steadman St. Roll him east to 5th street up the driveway around the North Side of the house and in the side door. It would be of great help to be able to simply roll him straight across the street and up onto the sidewalk here.

Thank you all for considering helping us out with this situation. Have a great evening and my God Bless you for all you do for the residents of Anthony. ]

Sincerely  
Richard Martin
