### Item Details

The 2025 Pavement Preservation Project applied Reclamite asphalt rejuvenator to approximately 21 miles of town-maintained streets. The project is now complete. Application areas were estimated using existing GIS data (290,598 square yards). Actual field measurements (312,688 square yards) exceeded the estimated values by ~7.6%.

Staff agreed to the actual quantities needed on-site as necessary and the contract needed to be amended to account for the additional cost.
