Item Details

At the October 1, 2019, the Town Council heard about an idea relative to increasing our generation of electricity using solar PV and, after discussion that centered around taking a broader look at different ways from demand and supply sides to meet the Clean Energy goals, directed staff to include a study relative to this topic in the FY 2020-21 budget. Mr. Jensen is asking to have this item discussed and have the direction to staff modified to have this work begin in the current fiscal year.
