CASE NUMBER RZ-2022-111

Jose Paz-Ontiveros

PUBLIC HEARING DATE

May 10, 2022

PROPERTY ADDRESS/LOCATION 2305 N 8th Street

SUMMARY OF REQUEST

The subject property is located at 2305 N 8th Street. The surrounding area is comprised of residential uses. The property consists of approximately 3.4 acres. The project will be to develop a duplex. A portion of the site is within the floodplain. The applicants are requesting a rezone from R-1, Low Density Residential District to an R-3, High Density Residential District.

☐ APPROVE WITH CONDITIONS

□ DENY

COMPATIBILITY with the COMPREHENSIVE PLAN The Future Land Use portion of the Comprehensive Plan designates the subject property as residential use. The proposed use is also residential. The Plan did not differentiate in terms of residential density This will also help to meet the goal from Chapter 3 to "encourage the availability of housing in Arkansas City for all ages and income groups" Recent studies of our current

housing situation also suggests that the City work to create greater housing options with greater density.

PROPERTY HISTORY

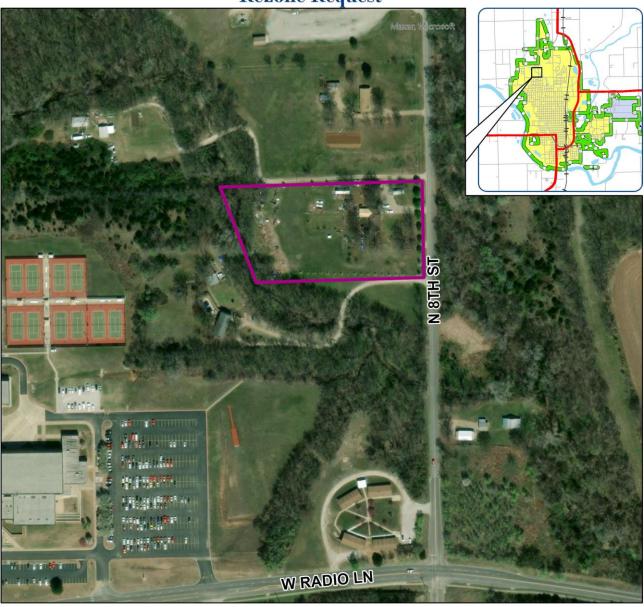

The property was developed with a single family dwelling unit in 1962 according to County records. Additional site improvements have been made in the years since. No other land use records were found.

COMPATIBILITY with the ZONING ORDINANCE

It is the intent of the residential zoning districts to provide for areas of low, medium and high density residential development including certain public or private uses which are compatible with residential development. The change in classification would be consistent with the intent and purpose of these regulations.

Findings

When a proposed amendment would result in a change of the zoning classification of any specific property, the recommendation of the Planning Commission, accompanied by a copy of the record of the hearing, shall contain statements as to the present classification, the classification under the proposed amendment, the reasons for seeking such reclassification, a summary of the facts presented, and a statement of the factors upon which the recommendation of the Planning Commission is based, using the following guidelines. Note that all references to agriculture in this report also include associated residential uses.

1. Whether the change in classification would be consistent with the intent and purpose of these regulations;

It is the intent of the residential zoning districts to provide for areas of low, medium and high density residential development including certain public or private uses which are compatible with residential development. The change in classification would be consistent with the intent and purpose of these regulations.

2. The character and condition of the surrounding neighborhood and its effect on the proposed change;

The surrounding area is comprised of residential uses. The proximity of the site to the C Street Canal Floodplain has largely prevented increased density from occurring. Much of the existing site is also in the floodplain. Any development within the floodplain would be required to meet all floodplain management regulations.

Looking across 8th Street-4/25/22

3. Whether the proposed amendment is made necessary because of changed or changing conditions in the area affected, and, if so, the nature of such changed or changing conditions;

The current Residential Zoning District does not allow the proposed use. The current district allows single family dwellings and Two Family dwellings are allowed with a conditional use permit. The proposed use is to add two dwelling units for a total of three units. An alternative to the proposal would be to rezone the property to R-2 and a conditional use permit would then be needed to allow three or more families. It is for the reason of simplicity that R-3 was chosen as the most appropriate district for this project. R-3 would also permit additional dwelling units to be added in the future. The general area around this site has seen increased housing demand.

4. The current zoning and uses of nearby properties, and the effect on existing nearby land uses upon such a change in classification;

The area is surrounded by residential uses and is all zoned for residential. The general area around the site is seeing an increase in housing demand and increasing density of residential uses.

5. Whether every use that would be permitted on the property as reclassified would be compatible with the uses permitted on other property in the immediate vicinity:

R-3 zoning does allow increased housing density. All development is currently served by septic tanks for sewage disposal.

6. The suitability of the applicants property for the uses to which it has been restricted;

The property is currently zoned for residential use and is large enough to sustain additional residential density. The proposed use is an increase in residential density that is not allowed in an R-1 district. Increased density will put additional pressure on the existing floodplain. All construction will have to be built to the standards set out in the floodplain management ordinance.

7. The length of time the subject property has remained vacant or undeveloped as zoned;

The property is not currently vacant.

8. Whether adequate sewer and water facilities, and all other needed public services exist or can

be provided to serve the uses that would be permitted on the property if it were reclassified;

All water, sewer and other utilities are readily available at or near the site. Police and Fire should be able to serve the proposed use without any changes to existing services.

9. The general amount of vacant land that currently has the same zoning classification proposed for the subject property, particularly in the vicinity of the subject property, and any special circumstances that make a substantial part of such vacant land available or not available for development;

There is other land that could be used for such a use within the City but it is not owned by the applicant.

10. Whether the proposed amendment would be in conformance to and further enhance the implementation of the City's Comprehensive Plan;

The Future Land Use portion of the Comprehensive Plan designates the subject property as residential use. The proposed use is also residential. The Plan did not differentiate in terms of residential density This will also help to meet the goal from Chapter 3 to "encourage the availability of housing in Arkansas City for all ages and income groups" Recent studies of our current housing situation also suggests that the City work to create greater housing options with greater density.

11. Whether the relative gain to the public health, safety, and general welfare outweighs the hardship imposed upon the applicant by not upgrading the value of the property by such reclassification; and,

The public health, safety and general welfare should not be negatively impacted by this rezoning.

12. Public Comments

The public overall was not in opposition to the request. One owner wanted to ensure that her private drive would not be used for access to this property.

13. Such other factors as the Planning Commission may deem relevant from the facts and evidence presented in the application

The Planning Commission recommended denial of this request due to citizen feedback. Citizens were concerned about increased traffic on an already insufficient 8th Street. Planning Commissioners also had concerns about increased housing density within the floodplain.

14. The recommendations of professional staff;

It is the recommendation of staff that the requested rezoning R-1 to R-3 be approved based on the following conclusions:

- The development appears compatible with the area.
- The lot is large enough to handle additional dwelling units
- The use helps to alleviate the current housing shortage
- The general area around the site is seeing an increase in housing demand and density
- The public health, safety and general welfare should not be negatively impacted by this rezoning
- All utilities are readily available at or near the site.

Based on the decision of the Planning Commission, staff now recommends denial of the application and suggests an alternate approach of splitting the lot according to the lot split requirements and building a single family home on the new lot. Floodplain Management requirements would still have to be met. The new home would also be required to connect to the city sanitary sewer. This alternative would not require a rezoning of the property.
