City of Arkansas City Welcome Signs

-A timeless piece for the community blending the old with the new-

35' 17'

Include modern elements with concrete & steel.

Concrete will be blasted to expose aggregate and to cut-in the pattern of the rivers and create a natural movement and texture to design.

Raised 7-gauge steel letters will be overlaid on the concrete and secured with exposed hardware to add an industrial element .

Elements of yesteryear brought to life utilizing brick pavers.

Utilization of Silverdale limestone for an organic & earthy feel.
