

mind?

- Will the permit granting authority consider the amateur's need for effective communications from the amateur's perspective, and work to reasonably accommodate effective communications?

The locality must answer “**no**” to these questions:

- Does the ordinance permit a “balancing of interests” approach to the application for a permit?
- Does the ordinance “impinge on the needs of amateur operators to engage in amateur communications”?
- Is there a fixed or unvarying height limit, after which the only possible way to get a permit is by variance?
- Has the permit granting authority considered radio frequency interference (RFI) or television interference (TVI)?
