Meeting Date: May 9, 2023

Information Technology Department 2023 – 2025 Strategic Plan

Department:	Information Technology Department
Presenter:	Ms. Tameka Allen, CIO
Caption:	Present the Information Technology Department 2023 – 2025 Strategic Plan for information
Background:	The Information Technology Strategic Plan was produced through a collaborative strategic planning process within the Information Technology (IT) Department. This plan is based on extensive input from city staff, research on industry best practices, and many discussions with IT senior management. It identifies the organization's current technology needs and, to every extent possible, anticipates future needs. The plan is based on the premise that the city must provide proven, leading-edge technology tools that will enhance service quality, efficiency and quality of life.
Analysis:	The Strategic Plan lays out the IT Department's mission, vision, goals, and strategic initiatives. This is a living document that will be updated regularly to address the city's changing technology needs. This strategic plan is not meant to be a list of every project Information Technology will undertake over the next three years. Rather, it is a road map that articulates the strategies IT will use to anticipate and meet the organization's emerging technology needs. The plan specifies ways to implement exciting developments in technology that will improve efficiency, effectiveness, responsiveness, transparency and accountability throughout our organization.
