

## **Engineer Service Meeting**

Meeting Date: 04/29/2025

#6 & #7 Basin Inlet Valves

---

<b>Department:</b>	Utilities - 4416
<b>Presenter:</b>	Wes Byne
<b>Caption:</b>	Approve Emergency Procurement of 30" valves for Highland WTP.
<b>Background:</b>	<p>The 30" inch inlet valves to basin's 6 &amp; 7 at the Highland Water Treatment plant are not properly seating and do not seal off water flow. This negatively impacts operations and our ability to repair and clean individual sedimentation basins. These valves typically have a very long lead time, and usually require at least 26 weeks to procure. A local supply house, Fortiline, has 2 of them on the shelf and since they are already here in the USA they are not subject to the tariffs that will be affecting new purchases.</p> <p>.</p>
<b>Analysis:</b>	<p>This is an emergency request, and a PO was already requested due to the time sensitiveness of the repair. Therefore, this agenda is for ratification of funds.</p>
<b>Financial Impact:</b>	\$32,094.00 from budgeted funds
<b>Alternatives:</b>	None Recommended
<b>Recommendation:</b>	Approve Purchase of Services for this Critical Infrastructure.
<b>Funds are available in the following accounts:</b>	506-04-3520-5421110
<b><u>REVIEWED AND APPROVED BY:</u></b>	N/A
