Background:	This project was initiated by Augusta Commission at the request of residential neighborhoods along SR 383 / Jimmie Dyess Parkway corridor. On January 2, 2024 Augusta Commission approved the project and \$500,000 ARAP funds for this project. Accordingly, Augusta Engineering initiated project with Georgia Power (GP) to design and install lighting fit to budget within segment of Jimmie Dyess parkway. GP determined 24 lights will be constructed to meet limitation. GP completed the design and submitted to GDOT for permitting since roadway is a state road. Recently GDOT approved GP permitting. However, prior to start of lighting construction, Augusta needs to enter into an agreement with GDOT for construction of these lights.
Analysis:	Agreement would allow construction of streetlighting improvements within SR 383 / Jimmie Dyess Parkway corridor from Wrightsboro Rd. to approx. 1150ft South of Powell Rd. In addition, street lighting improvements will enhance safety and aesthetic of this corridor. GP will install 24 lights within this segment.
