Mr. Andy Penick, Director
Procurement Department
Augusta-Richmond County, Georgia

Re: Emergency Requisition – Fingerprint Scanning System for CBWDC, RCSO, Courthouse

Director Penick,

The Sheriff's Office is requesting that an emergency requisition be authorized for the purchase, delivery, installation and training for a new fingerprint scanning system. This system is used at the Detention Center in the Processing area (2 units), at the Courthouse (1 unit) and RCSO Human Resources (1 Applicant unit).

The Sheriff's Office has previously had support and access for the required transmission of fingerprints through Idemia, a company who has decided to dismiss their customer base in Georgia, effective May 1. Since this company did not give timely notice of their decision, the Sheriff's Office (along with many other Georgia agencies) have been left in the lurch. Although we are still connected, there has been no official notification on how long their "extension" may last.

To transition to a new provider, two companies were identified and able to submit quotations to meet the legally required needs of our agency. Having properly vetted both proposals, we are asking for authorization to proceed with an emergency purchase – **Eagle Advantage Solutions, Inc. \$45,829.37 (preferred)** and Dataworks Plus \$58,700.00. Time is of the essence, as we are unsure when Idemia plans to terminate our connectivity.

Funding has been identified through 2780832511-5421110. Once the purchase process has been approved and a Purchase Order is issued, we will be sure to follow up with Procurement regarding the proper procedure for Commission approval/information.

Thank you for your time and consideration of this emergency request.

For the Sheriff,

A handwritten signature in black ink that reads "Chester V. Huffman, Jr." in a cursive script.

3 Itemized Component Details

3.1 LiveScan Plus

LiveScan Plus is an advanced solution suite that allows you to collect, store, search, and manage every piece of biometric data from criminal booking or applicant processing. The proposed system configuration will allow you to capture slaps, rolls, and palm prints.

3.1.1 The DataWorks Plus Difference

DataWorks Plus has taken a different approach from other livescan vendors. It is flexible in design and configuration. Each livescan is custom configured to contain only the features required by each individual agency; as a result, our proposal offers several features as options for your consideration:

Customizable and Adaptable: Capture all data and images efficiently and accurately. Customizable field validation ensures that all required fields are completed accurately prior to submission.
