RE: Zero Turn Radius (ZTR) Mower purchase

Department/Program: Parks & Recreation/Parks

Explanation: The 2023 budget includes \$16,500 to replace the park department's 2007 zero turn radius mower. This mower is used almost every day during the mowing season and is showing its age after 15 years. Several repairs have been made to this unit in recent years and more repairs are needed.

We currently have other pieces of Ferris equipment and have found them to be very reliable.

Recommendation: Award contract for the purchase of a new Ferris zero turn radius mower to Scott's Power equipment through the Missouri State contract for \$14,939 and sell the old ZTR on GovDeals.
