- B. If a dedication requirement arose prior to the effective date of these provisions, that dedication requirement shall be controlled by the public open space dedication requirements in effect at the time such obligation arose, except that additional dedication shall be required if the actual density of structures constructed upon the property is greater than the previously- assumed density. Additional dedication shall be required only for the increase in density and shall be based upon the ratio set forth in Section 17.01.005 of this Section.

**Sec. 17.01.010 Additional Requirements.**

- A. Any land dedicated to the City under this Section shall be suitable for park and recreation uses as determined by the City.

If accepted as part of the park, the detention or retention area design shall be as recommended by the Parks and Recreation Department and shall meet all park requirements consistent with the Parks, Recreation and Open Space Master Plan.
- C. Parks should be easy to access and open to public view so as to benefit area development, enhance the visual character of the City, protect public safety and minimize conflict with adjacent land uses. The following guidelines should be used in designing parks and adjacent development:
  - 1. Where physically feasible, park sites should be located adjacent to greenways or schools in order to encourage both shared facilities and the potential co-development of new sites.
  - 2. A proposed subdivision adjacent to a park shall not be designed to restrict reasonable access to the park from other area subdivisions. Street and greenway connections to existing or future adjoining subdivisions may be required to provide reasonable access to parks.
  - 3. Streets abutting a public park shall be built in accordance with the Master Transportation Plan and the standards of this Bastrop Building Block (B3) Code, Code of Ordinances, and any other applicable code; however, the City may require any local collector street built adjacent to a park to be constructed to a primary
