

Mayfest Park Maintenance Enhancements Report

Date: 3/26/2025

Prepared by: Fleet & Facility Team

Overview: The Fleet & Facility team has recently completed and is currently executing multiple maintenance enhancements at Mayfest Park to ensure the safety, functionality, and aesthetic appeal of the facilities. Below is a summary of the latest accomplishments:

Completed Work:

- **Door Replacement & Repairs:** Installed new double doors and a single door, and painted both sets of doors. During the door replacement process, rotten siding on either side of the doors was discovered and replaced. Upon removal of the siding, it was found that the rim board and studs were also rotted. These were replaced with proper materials to ensure structural longevity.

Ongoing Projects:

- **Painting Siding:** The new siding surrounding the replaced doors is scheduled to be painted to match the rest of the building tomorrow.

Future Projects:

- **Water Runoff & Erosion Control:** Develop a plan to help keep dirt in place where water runs off the roof and erodes the ground, which currently pushes soil up against the building and restarts the damage cycle.

These improvements contribute to the park's overall maintenance and long-term usability, enhancing the experience for visitors and staff alike. Further updates will be provided as projects progress.
