

ITEM REPORT CITY COUNCIL

Agenda Date: 6/16/2026
Agenda Section: Agenda Item

Department Origination: Public Works

Agenda Item: 2027 Mill & Overlay and Full Depth Reclamation Improvements Project Memo
Recommendations

Approval Required: No Action Required

BACKGROUND

Widseth Consultant Engineer Bitter walked all the roadway segments that were identified for Mill & Overlay or Full Depth Reclamation improvements in 2027. Mr. Bitter will provide a brief overview of the memo he drafted that is on the regularly scheduled meeting agenda under the "Accept the Widseth road Recommendation memo for the 2027 Mill & Overlay and Full Depth reclamation Improvements Project, Municipal Project Number 4427".

FINANCIAL IMPLICATIONS

There are no immediate financial implications associated with the memo; however, the recommendations from the memo will impact the project costs and will be incorporated into a feasibility report.

Widseth's current contract for developing a feasibility report was approved by city council in December of 2025 for the 2027 Mill & Overlay and FDR project. With the adjustments that were made to the 2026 Mill & Overlay project scope earlier this year, along with the recommendations from this memo, a fee amendment will be presented in July to finish the feasibility report.

STAFF RECOMMENDATIONS

Staff is seeking Council's input on the memo prior to requesting Widseth to draft a contract amendment for the project scope changes. Utilities Commission and staff support the recommendations from the memo.

COUNCIL ACTION REQUESTED

No formal action requested on work session.
