
Brief Description of Request: (Attach separate sheet, if necessary)

There is a man-made cut-out on the south end of our property that was created by a previous owner (see picture of COS) we would like to use the leftover fill from the house and bring in any additional fill required to fix the cut-out so the slope matches the existing area around the cutout. In addition to being a safety hazard, it also creates an erosion issue in the hillside. I would stabilize the area by promptly seeding it and covering it with straw. This repair would eliminate the erosion issue and create a continuous slope, improving the hillside.

If this permit is granted, I hereby certify that all work will be done as stated herein and in accordance with all applicable laws and ordinances of the State of Minnesota and the City of Baxter.
