City Clerk/Treasurer reports that Bayard fell victim to a spoofing scam, wherein $115,00.00 was placed into an account created by the scam perpetrators. The account was made to appear like an account held by Morrow Enterprises, who is currently constructing improvements at the wastewater facility. For weeks, the scammers had e-mailed the Bayard as though they were Morrow Enterprises, and when a payment came due, the scammers provided information for a direct deposit into their account. Not all money owed under the contract was transferred to the scammers. Fortunately, Bayard realized what was happening before further funds were transferred. This matter has been reported to the States Police, and is under currently under investigation.
