The Online Reverse Auction is an auction event in which bidders submit pricing in a decreasing manner. In the City of Bay St. Louis Reverse Auctions, all bidders will be able to see and consider their competitors' bids and decide if additional bidding is necessary on their part.

There is no advantage for a bidder to wait until near closing time of the auction to place a bid. Any bid placed during the last 5 minutes of the bidding time window will cause an automatic 5-minute extension of time. Each additional bid after that will cause another 5-minute extension, and will continue until 5 minutes have gone by without a bid. At that point, the system will shut down and the auction will end.

More information regarding the live Reverse Auction event will be provided in the invitation to participate
