TECHNICAL MEMORANDUM

To: Jeff Hart, PE
Public Works Director/City Engineer, City of Beaumont

From: Fred Minagar, MS, PE, RCE, FITE
City Traffic Engineer, Principal, Minagar & Associates, Inc.

Date: March 18, 2021

Re: Feasibility Study for Potential Closure on Veile Ave from Luis Estrada Rd to W 6th St

Executive Summary:

The City of Beaumont requested from Minagar & Associates, Inc. to conduct a study of the existing traffic conditions on Veile Ave, Luis Estrada Rd, and 6th St to validate the potential closure on Veile Ave from Luis Estrada Rd to W 6th St and installation of a new 8" raised Type-A median curb on 6th St Eastbound/Westbound at Veile Ave.

Minagar & Associates' staff collected the existing traffic volumes and field data for the intersections of Veile Ave at W. 6th St and Luis Estrada Rd at Veile Ave. The collected data was analyzed utilizing the latest microcomputer modeling software to assess before and after the proposed geometry improvements. It is therefore, concluded that by implementing and constructing the aforementioned improvements the vehicular safety of the subject intersections shall be enhanced. Additionally by physically restricting all the left turn movements from the intersection of Veile Ave and 6th St, the number of potential traffic accidents shall be eliminated. The Level of Service (LOS) of the subject intersections shall remain at the excellent LOS "A" with all the proposed physical improvements.

Background:

Figure 1 – Existing Geometric Condition of 6th St and Veile Ave

Figure 2 – Existing Geometric Condition of Luis Estrada Rd and Veile Ave

The City of Beaumont requested that Minagar & Associates, Inc. study the prevailing traffic conditions at the unsignalized intersections of 6th St and Veile Ave, and Luis Estrada Rd and Veile Ave in order to validate the potential closure on Veile Ave from Luis Estrada Rd to W 6th St and installation of a new 8" raised Type-A median curb on 6th St Eastbound/Westbound at Veile Ave.

Analysis:

6th St is the main street that connects Interstate 10 West and State Route 60 West in the City of Beaumont while, Veile Ave has only one lane which is separated by yellow striping as shown in Figure 1. Where the traffic movements on 6th St are free and Veile Ave Southbound is controlled by a STOP sign to enter into the freeway. 6th St has two through lanes including a de-facto right turn lane for the Westbound and Eastbound at the intersection of 6th St and Veile Ave. While, Veile Ave has one lane for only Right Turn, which is shown in the Figures 3 and 4 with multiple traffic control devices. Figures 5 and 6 illustrate the existing conditions of the Westbound and Eastbound 6th St.

At the intersection of Veile Ave and Luis Estrada Rd, the traffic movements on Veile Ave are free and Luis Estrada Rd Eastbound and Westbound are controlled by a STOP sign. Luis Estrada Rd has one shared lane at Veile Ave. Southbound Veile Ave has one shared through lane and one left turn lane and Northbound Veile Ave has one shared through/left lane including a de-facto right turn lane. Figures 7 and 8 illustrate the existing conditions of Luis Estrada Rd, and Figures 9 and 10 illustrate the existing conditions of Veile Ave.

Minagar & Associates, Inc. conducted the field data collection at the 6th St and Veile Ave intersection for a typical weekday (Wednesday) on September 9, 2020, and at Luis Estrada Rd and Veile Ave intersection for a typical weekday (Thursday) on March 11, 2021. The data collection was comprised of traffic volumes covering the AM peak (7:00 AM - 9:00 AM), Midday

peak (11:00 AM - 1:00 PM) and PM peak (4:00 PM - 6:00 PM) hours. The raw traffic counts were organized into three sets of peak hours that included intersection turning movement volumes, lane geometries and traffic control parameters, were used to prepared traffic volume reports for the existing and proposed conditions utilizing the latest microcomputer software Synchro - 10.

Three peak-hour Level of Service (LOS) analyses were performed to evaluate the traffic service levels under the existing and proposed conditions with the road closure on Veile Ave from Luis Estrada Rd to W 6th St and a new 8" raised Type-A median curb at Veile Ave Northbound and 6th St Eastbound/Westbound respectively.

The Synchro computer analysis was based on the 2000 Highway Capacity Manual, which defines LOS using 6 levels, with LOS "A" having the best-operating conditions and LOS "F" having the worst operating conditions. Level of Service is dependent on the amount of time delay and type of roadway the LOS criteria are being applied to, with thresholds set for each LOS grade. Table 1 below summarizes the thresholds for each level.

Table 1: Level of Service Threshold Summary

Level of Service	Delay Value (seconds) for Unsignalized Intersection	Delay Value (seconds) for Signalized Intersection
A	0.0 to 10.0	0.0 to 10.0
B	>10.0 to 15.0	>10.0 to 20.0
C	>15.0 to 25.0	>20.0 to 35.0
D	>25.0 to 35.0	>35.0 to 55.0
E	>35.0 to 50.0	>55.0 to 80.0
F	>50.0	>80.0

Figure 3 - Existing Traffic Control Devices and Striping at Northbound Veile Ave

Figure 4 - Existing Traffic Control Devices and Striping at Southbound Veile Ave

Figure 5 - Existing Traffic Control Devices and Striping at Eastbound Veile Ave

Figure 6 - Existing Traffic Control Devices and Striping at Westbound Veile Ave

Figure 7 - Existing Traffic Control Devices and Striping at Eastbound Luis Estrada Road

Figure 8 - Existing Traffic Control Devices and Striping at Westbound Luis Estrada Road

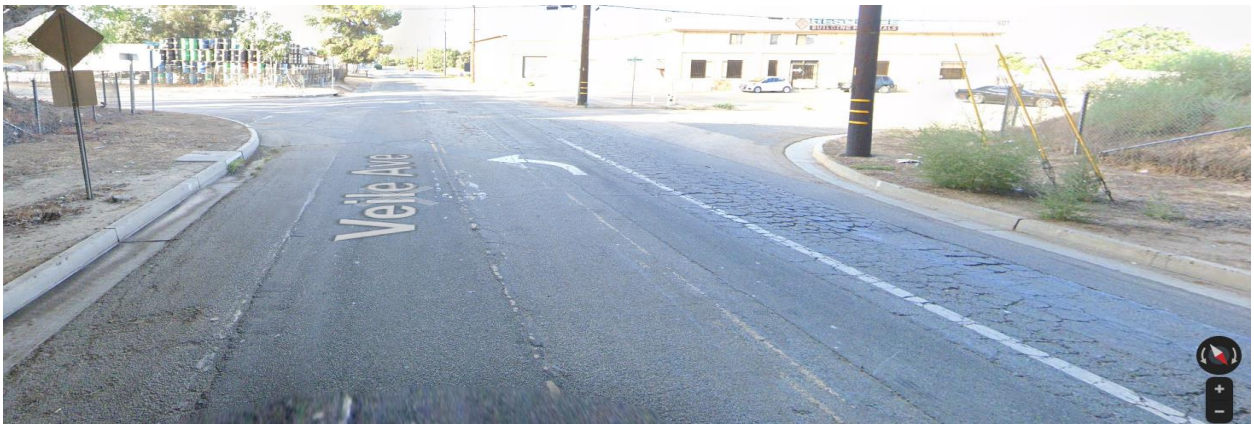

Figure 9 - Existing Traffic Control Devices and Striping at Southbound Veile Ave

Figure 10 - Existing Traffic Control Devices and Striping at Northbound Veile Ave

Figures 11, 12 and 13 show the existing conditions of AM, MD and PM peak hours respectively. Below figures show exactly the same geometric condition of the intersection of 6th St and Veile Ave and the intersection of Veile Ave and Luis Estrada Rd. The Levels of Service and average delays for AM, MD and PM peak hours are shown in Appendix A.

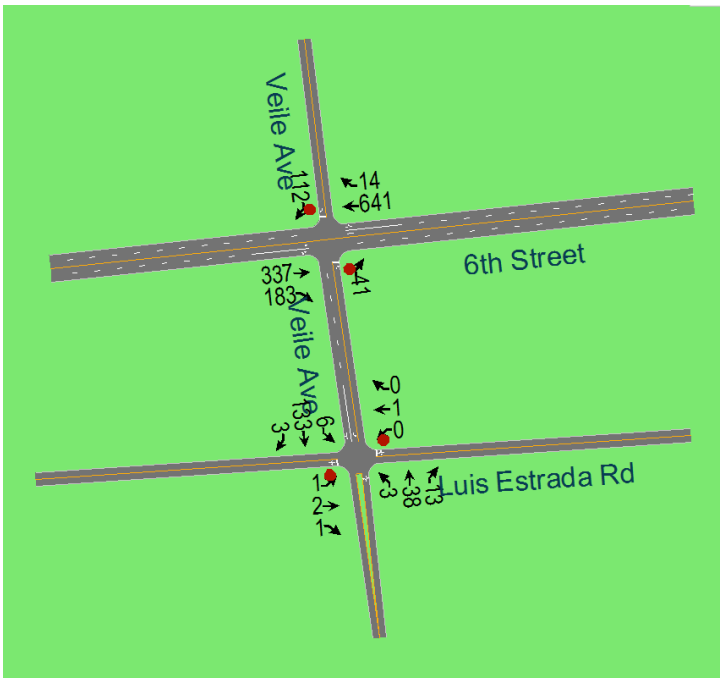

Figure 11 – Existing AM Peak Hour Volumes
6th St and Veile Ave
Veile Ave and Luis Estrada Rd

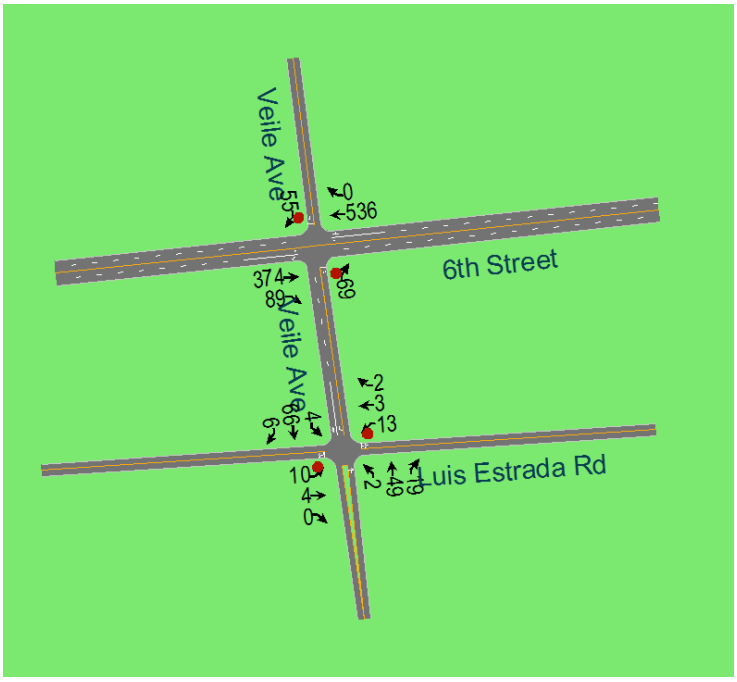

Figure 12 – Existing MD Peak Hour Volumes
6th St and Veile Ave
Veile Ave and Luis Estrada Rd

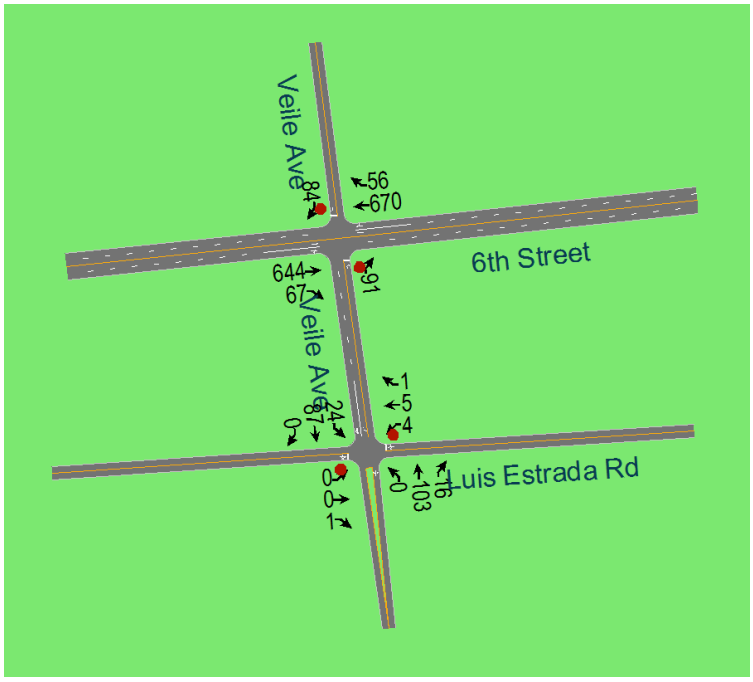

Figure 13 – Existing PM Peak Hour Volumes
6th Street and Veile Ave
Veile Ave and Luis Estrada Rd

Tables 2 and 3 show the results of LOS and delay values for the existing conditions for 6th St and Veile Ave and Luis Estrada Rd and Veile Ave.

Table 2: LOS Intersection Summary for the Existing Conditions for 6th St and Veile Ave

Baseline Year 2020 Existing Condition				
Study Intersection		Peak Hour	Intersection LOS	Delay Value (Second)
Location	Control			
6th St & Veile Ave	Stop	AM	A	1.3
		MD	A	1.2
		PM	A	1.3

Table 3: LOS Intersection Summary for the Existing Conditions for Luis Estrada Rd and Veile Ave

Baseline Year 2021 Existing Condition				
Study Intersection		Peak Hour	Intersection LOS	Delay Value (Second)
Location	Control			
Luis Estrada Rd & Veile Ave	Stop	AM	A	0.6
		MD	A	1.9
		PM	A	1.2

Subsequent to Minagar & Associates, Inc. analyses, it was revealed that the existing striping on Northbound and Southbound approaches of Veile Ave are faded and they need to be re-striped with thermoplastic paints. Specifically the Northbound approach of Veile Ave—at the southeast corner of the intersection needs to be re-painted for a stop bar and STOP legend.

Furthermore, City plans close Veile Ave from Luis Estrada Rd to W 6th St. In addition, City also plans to remove the existing rolled curb and install 8" raised Type-A curb on East-West bound to restrict left turns from 6th St to Veile Ave towards Northbound and Southbound. With the proposed closure and new raised Type-A curb, all the through traffic movements shall be restricted completely from the North- to Southbound direction on Veile Ave.

Figures 14, 15, and 16 show the AM, MD and PM peak hour traffic volumes with the proposed Veile Ave roadway closure respectively. Below figures show exactly the same geometric condition of the intersection of 6th St and Veile Ave and the intersection of Veile Ave and Luis Estrada Rd. The Levels of Service and average delays for AM, MD and PM peak hours are shown in Appendix A.

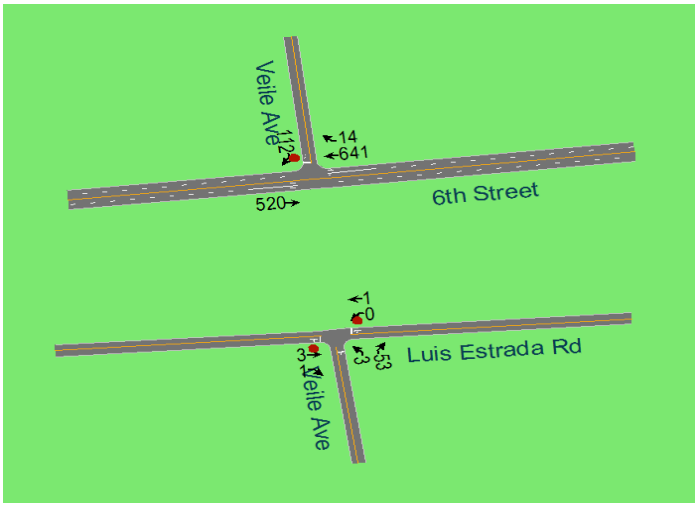

Figure 14 – AM Peak Hour Volumes with the Proposed Veile Ave Roadway Segment Closure Between 6th St and Luis Estrada Rd

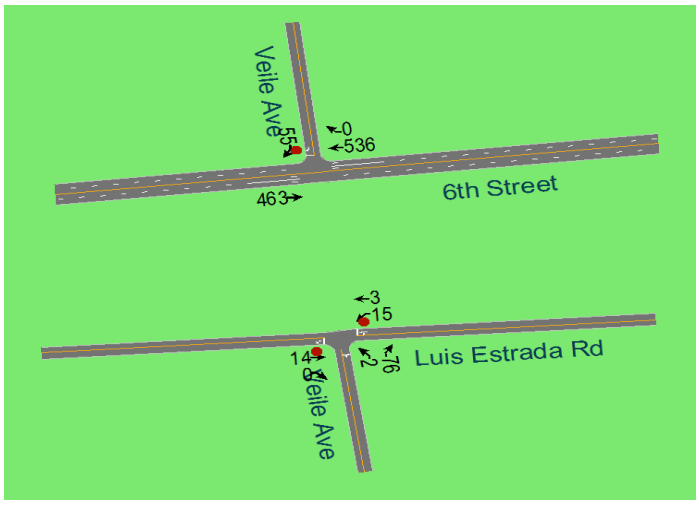

Figure 15 – MD Peak Hour Volumes with the Proposed Veile Ave Roadway Segment Closure Between 6th St and Luis Estrada Rd

Figure 16 – PM Peak Hour Volumes with the Proposed Veile Ave Roadway Segment Closure Between 6th St and Luis Estrada Rd

Tables 4 and 5 show the results of LOS and delay values for the proposed conditions for 6th St and Veile Ave and Luis Estrada Rd and Veile Ave.

Table 4: LOS Intersection Summary for the Proposed Conditions for 6th St & Veile Ave

Baseline Year 2020 With the Proposed Veile Ave Roadway Segment Closure Condition				
Study Intersection		Peak Hour	Intersection LOS	Delay Value (Second)
Location	Control			
6th St & Veile Ave	Stop	AM	A	1.0
		MD	A	0.6
		PM	A	0.6

Table 5: LOS Intersection Summary for the Proposed Conditions for Luis Estrada Rd & Veile Ave

Baseline Year 2021 With the Proposed Veile Ave Roadway Segment Closure Condition				
Study Intersection		Peak Hour	Intersection LOS	Delay Value (Second)
Location	Control			
Luis Estrada Rd & Veile Ave	Stop	AM	A	1.0
		MD	A	2.8
		PM	A	0.7

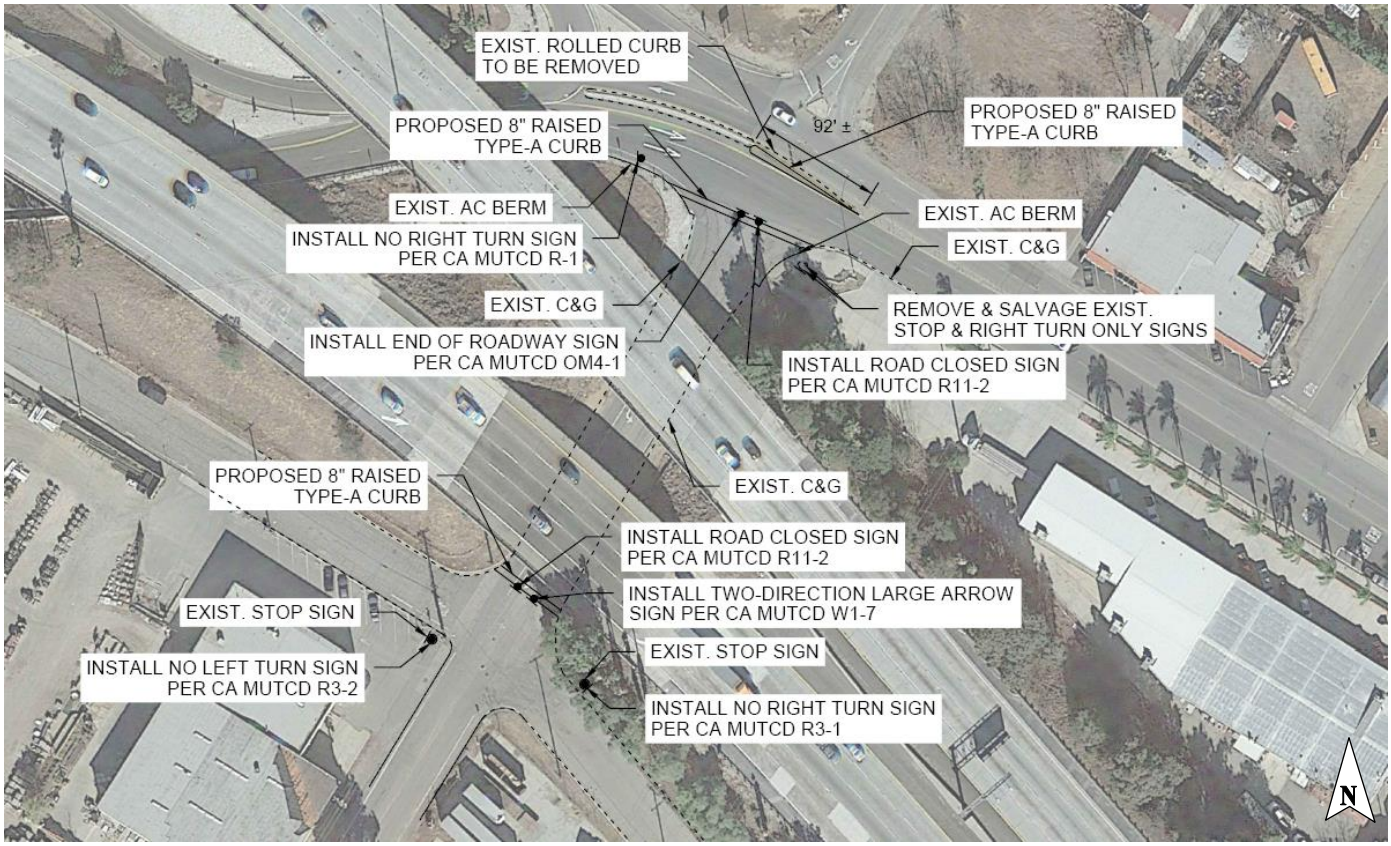

Figure 12 - Proposed Roadway Closure on Veile Ave from Luis Estrada Rd to W 6th St and Type-A Raised Curb at 6th St and Veile Ave

Based upon the analyses, it is therefore, concluded that by constructing the proposed improvements, the vehicular safety of the subject intersections shall be enhanced. Additionally by physically restricting all the left turn movements from the intersection of Veile Ave and 6th St, the number of potential traffic accidents shall be eliminated. The Level of Service of the subject intersection shall remain at the excellent Level of Service "A" with all the proposed physical improvements.

Respectfully submitted,

MINAGAR & ASSOCIATES, INC.
(A California Corporation)

Fred Minagar, MS, PE, RCE, FITE
City Traffic Engineer/Principal/Senior Project Manager
