

City of Beaumont Wastewater Treatment Plant Salt Mitigation Upgrade Project Change Order No. 12

Dec 16, 2019

Colondar Comm

			Amount	Days	Date
Contractor:	W.M. Lyles Co.	Original Contract:	\$ 53,312,000.00	820	1/26/2021
Project Name:	Wastewater Treatment Plant Salt Mitigation Upgrade Project	Previous Approved Changes:	\$1,132,168.20	95	5/1/2021
Contract No.:	C18-80	This Change: Amount	\$91,417.26	0	
CO Number:	12	Revised Contract:	\$54,535,585.46	915	5/1/2021
		Previous Phase 1 Completion Date			4/26/2020
		Revised Phase 1 Completion Date			4/26/2020

This change order covers changes to the subject contract as described herein. The Contractor shall supply all labor, equipment and materials to complete the Change Order items for the lump sum price agreed upon herein. All Change Order items must be submitted to the City for approval prior to fabrication.

Item No.	PCO No.	Description of Changes	Amount	Phase 1 Time Extension (CD*)	Phase 2 / Project Completion Time Extension (CD*)
1	25	DCM-17, CLAR-23, WML COP-026R1 RO-Sulfuric Acid Chemical Piping Material Change	\$1,514.16	0	0
2	29	RFI #094, WML COP-029 Solids Feed Pump TE/TSH Thermocouple Elements	\$2,354.10	0	0
3	30	DCM #16, CLAR-20, WML COP-030 Solids Handling Bldg. Changes	\$87,549.00	0	0
4			\$0.00	0	0
		NET CHANGE IN CONTRACT AMOUNT – INCREASE (OR-DECREASE)	\$91,417.26	0	0

*Calendar Days

The amount of the Contract will be increased/decreased by the amount of Ninety-One Thousand Four Hundred Seventeen Dollars and twenty-six cents (\$91,417.26). The Contract Time will be increased by zero (0) calendar days.

The Contractor agrees to furnish all labor, equipment and materials and to perform all other necessary work, inclusive of the directly or indirectly related work, within the approved time extension required to complete the above Change Order items. The undersigned Contractor approves the foregoing Change Order as to the changes, if any, in the Contract Price specified for each item including any and all supervision costs and other miscellaneous costs relating to the change in Work, and as to the extension of time allowed, if any, for the completion of the entire Work on account of said Change Order. The City and the Contractor hereby agree that this Change Order constitutes full mutual accord and satisfaction for all time, all costs, and all impacts related directly or indirectly to this Change Order. The Contractor hereby agrees that this Change Order represents the full equitable adjustment owed under the Contract, and further agrees on behalf of himself and all subcontractors to waive all right to file any further claims or request for equitable adjustment arising out of or as a result of this Change Order or the cumulative effect of this Change Order on the performance of the overall Work under the Contract. This document will become a supplement of the contract and all provisions will apply hereto. It is understood that the Change Order shall be effective when approved by the City.

Design Adjustment: CLAR-23 / DCM-17 WML COP-026R1	RO C

RO Chemical - Sulfuric Acid Piping Material Change

City of Beaumont (Owner) has directed the Engineer to evaluate a potential alternative for currently specified PVDF piping for sulfuric acid service (93 to 96% concentration). As noted in Clarification #12, the sulfuric acid piping at the Tank Farm #1 was specified to be PVDF pipe and inside the MBR building 2" X ½" PVDF Proline piping (double containment). Alloy 20 piping was evaluated as an alternative that would potentially offer cost savings compared to PVDF piping and also provide a higher degree of service reliability (PVDF does not perform well if the sulfuric acid is above the design concentration of 96%).

Following the evaluation, it was determined that Alloy 20 piping may be used in lieu of currently specified PVDF piping. In addition, following shall apply:

Design and Scope Changes:

- Alloy 20 piping shall be Sch 40 piping with ID matching the current design.
- Alloy 20 piping shall be butt welded except at locations where it connects to valves and appurtenances. At these locations, connections shall be flanged. All gasket materials shall be compatible for sulfuric acid service (90% to 100% concentration).
- Based on the input from Owner, exposed Sulfuric Acid piping in the MBR building and Tank Farm shall not have double containment and shall be single wall, sch 40, ½" ID, Alloy 20 pipe. As noted in Clarification 12.1, buried Sulfuric Acid service piping shall be double contained piping consisting of SCH 80 CPVC containment pipe and ½" (ID) Tygon 2375-C tubing.
- Valves and appurtenances (strainers and injection quill) currently shown in the plans shall remain with following changes:
 - o Provide a cost for Alloy 20 valves and appurtenances with flanged connections.
 - o In order to potentially avoid additional costs and long lead times PVDF valves and strainers as currently specified may be acceptable (with flanged connections). Please provide a cost for this alternate option.
- Post field fabrication, piping system shall receive pickle and passivation protection both internal and external.
- Sulfuric Acid chemical pump skid piping shall be changed from CPVC material to PVDF.

Cost Impact:

The contractor's initial quote offered a cost credit of -\$19,969.00 excluding pickling & passivation. Design Engineer review comments required pickling & passivation for both internal and external of piping system, which required additional fittings, labor cost and outside vendor. MWHC evaluated the extra cost proposal by the Contractor.

MWHC recommends a contract cost increase of \$1,514.16 to be executed in a change order for changes to the complete sulfuric acid chemical dosing system; MBR\RO Building deliver piping, Pumping Skid and Sulfuric Acid Storage Tank Piping.

CITY OF BEAUMONT WWTP SALT MITIGATION UPGRADE PROJECT

CHANGE ORDER PROPOSAL (COP) # 026R1 (By Contractor)

From (Contractor):

To (Engineer/CM):

PCO/DCM No.: DCM no.17	L								
Subject: RO Chemical – Sulfuric Acid Piping Material C	Change								
Reference Documents: Clarification no. 17									
DESCRIPTION									
Please review the attached change order proposal associa	ated with the piping changes indicated in clarification no.								
17. Below is a summary of these changes.									
Changing of the above grade sulfuric acid piping material	from double contained PVDF to butt-welded alloy 20.								
In our proposal we are including flanged PVDF diaphrag	gm valves in liu of ball valves on the sulfuric acid piping.								
Cut sheets for the diaphragm valves check valve and strain	ners which we have taken into consideration in our pricing								
is included in this proposal.									
Also, included in this proposal is the additional costs associated from H20 Innovations for changing the piping on									
the sulfuric acid skid to PVDF as indicated in the email from Boris Petkovic dated 11/08/19.									
This proposal is valid for 30 days.									
COST ES	TIMATE								
Total additional cost of \$1,514.16, see attached breakdow	n.

Total

Standard Features (Sizes 1/2" - 2")

- Uniseat/seal of EPDM or FKM.
- Ball is the only moving part. It unseats to permit flow in one direction but seals against seat to prevent back flow
- · May be used vertically or horizontally
- Minimum shut-off of 5psi
- · All sizes rated for full vacuum service
- Solid thermoplastic ball

Options:

- PTFE coated FKM uniseat/seal
- Spring-loaded ball to assist ball in seating faster

Standard Features (Sizes 1/2" - 2")

- Flanged (ANSI) face-to-face dimensions are equivalent to most commonly used metallic volves
- Rugged body and bonnet are of solid thermoplastic for maximum corrosion resistance
- Uniquely designed body and bonnet together with diaphragms of new sealing designs by computer dynamic analysis for superior scaling
- Weir design for excellent throttling
- Bubble-tight sealing, even in applications such as slurries or suspended particles
- Bonnet seals to protect internal from corrosive environments
- Built-in travel stop to prevent overtightening or compressive strain on diaphragm
- Integrally molded bottom stand for simple yet firm panel mounting
- Indicator at the top for indication of valve position and prevention of overtightening
- PVDF gas barrier, which protects EPDM backing from gas permeation, is standard for all valves with PTFE diaphragm
- Low profile
- Bayonet structure to connect compressor and diaphragm –
 Easy diaphragm replacement

Options

- 2" square in
- Stem extensions [strate and two-piece design)
- · Locking device for tamper proofing
- alinwheel operator

Troubleshooting

What if fluid leaks when valve is fully closed?

- 1. Travel stop not set correctly. Adjust it per the Asahi Operation and Maintenance manual.
- 2. Solids built up inside valve. Clean inside, including weir and diaphragm.
- 3. Diaphragm and/or weir are worn or damaged. Change the

What if valve cannot be fully opened?

1. Diaphragm is not properly engaged with compressor. Check engagement per Operation and Maintenance manual.

What if fluid leaks to atmosphere?

- 1. Bonnet bolts not properly torqued, Re-torque according to Operation and Maintenance manual,
- 2. Line pressure exceeds maximum recommended line pressure. Check or reduce system line pressure.
- 3. Diaphragm has ruptured or has been chemically attacked, Replace diaphragm.

Sample Specification

All Type-14 flanged diaphragm valves shall be of solid thermoplastic construction for hody and bonnet with molded flanged ends. The valves shall come standard with a position indicator, travel stop (to prevent overtightoning) and bonnet O-ring sealing arrangement. The valve shall be weir type with a square bonnet body sealing design and bayonet connection diaphragm [1/2"-2"] or round bonnet body sealing design [2-1/2"-4"]. All PTFE diaphragms shall be supplied with a PVDF gas barrier between the layers of EPDM and PTFE for aggressive chemical service. The face-to-face dimensions shall conform to Type G. PVC conforming to ASTM D1784 Cell Classification 12454-A, CPVC conforming to ASTM D1784 Cell Classification 23567A, PP conforming to ASTM D4101 Cell Classification PP0210B67272, PPG (bonnet only) conforming to ASTM D4101 Cell Classification PPO110M20A21130, and PVDF conforming to ASTM D3222 Cell Classification Type II. PVC, CPVC, PP and PVDF shall be rated to 150psi for elastomeric and PTFE diaphragms. at 70° F., as manufactured by Asahi/America, Inc.

Used for PVDF body.

^P Used for PVC, CPVC, PP bodies

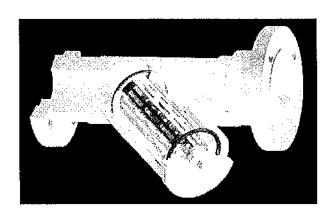

FLUOR-O-FLO®

PVDF & PTFE Y-Strainers

Removable PTFE Strainer Cartridge with Fluoropolymer Screen

Flanged • NPT • Tri-Clamp • Socket Weld

Micromold's Y-Strainers remove particles or debris from process lines handling extremely corrosive or high-purity fluids. To ensure maximum corrosion resistance and purity, all wetted materials are fluoroplastics.

PVDF Y-Strainers are available in 1/8" through 4" and PTFE Y-Strainers are available in 1/8" through 3" pipe sizes.

Easily cleaned, removable PTFE cartridges securely support ETFE screens in standard 11, 17, 30 or 51 mesh sizes. Standard PEEK screens available in mesh sizes ranging from 400 to 65 (12 to 155 microns). Other mesh sizes and types available on special order.

Open area ratio of screen to pipe meets or exceeds 2:1 for all sizes when used with a mesh having a minimum 48% open area.

Standard end connections fit NPT threaded, Tri-Clamp, flanged, and socket—or butt-weld (PVDF only) piping systems. We can provide virtually any connection (True-Union, etc.) on special order.

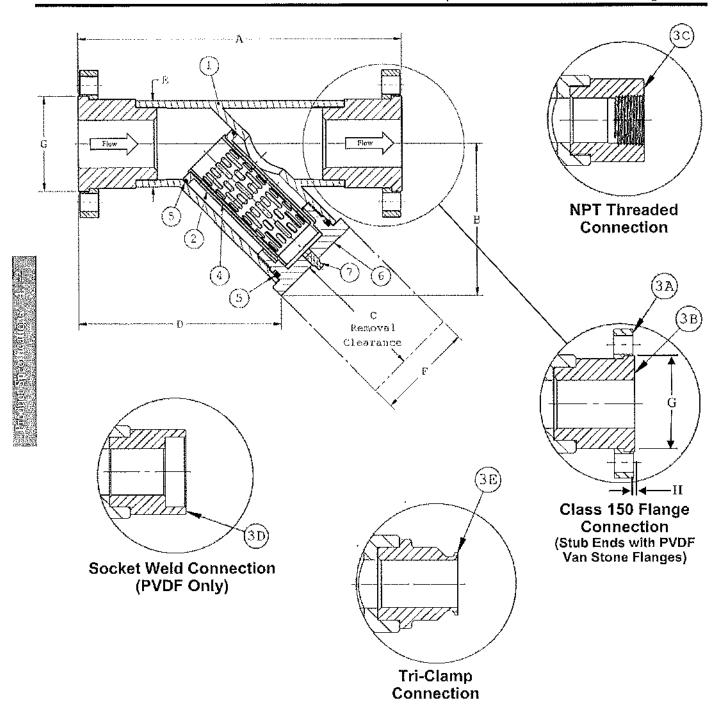

Units may be installed either horizontally or vertically.

Also available:

3B	PVDF Stub End	FTFE Stub Engl
3C	PVDF NPT Connector	PTFE NET Connector
3D	PVDF Socket Weld Connector	Not Available
3E	PVDF Tri-Clamp Connector	PTFE Ti-Clamp Connector
4	Fluoropolymer Screen	Phoropolymer Screen
5	FEP Encapsulated Silicone Rubber O-Ring	FEP Encapsulated Silicone Rubber C. Ring
6	PVDF Knurled Cap	PTFE Knurled Cap
7	PTFE Drain Plug	PTFE Drain Plug

Engineering Specifications

FLOUR-O-FLO® Y-Strainers shall be (PVDF or virgin PTFE) construction with (socket weld, NPT threaded, Tri-Clamp, or flanged) end connections. The strainers shall have covers removable without the use of tools to facilitate cleaning, and have an FEP encapsulated silicone rubber o-ring seal. Strainer to have a (1/8" or 1/4") NPT removable drain plug. Strainers to have a minimum 2:1 ratio of open area to the size-corresponding cross-sectional pipe area when used with a mesh screen having a minimum open area of 48%. Strainers shall have a removable PTFE strainer cartridge with FEP encapsulated silicone rubber o-ring seal that is secured to and removable with the cover. Strainer cartridges shall have perforated PTFE inner and outer cartridge components to secure screen mesh. As manufactured by MICROMOLD PRODUCTS, INC.

Dan,

We are okay for you to proceed in providing an updated cost proposal for the PVDF sulfuric acid skid.

Thanks. Regards,

Boris Petkovic, PE

Dan/Boris,

We would like to formally submit the proposal for the changes to the sulfuric acid system mentioned in the email below. Are we at a point where we can get a formal proposal from H20? If so, can you please send it over to us.

Thanks.

U18865-B01-0803,01 (Ammonium sulfate skid):

https://h2oinnovation.fileserverapp.com/files/96a448ba9b4324fc9939bbeda1f7568e.pdf U18865-B01-0802,01 (Sulfuric acid skid): In progress.

U18865-C06-0014,03 (Chemical metering pumps):

https://h2oinnovation.fileserverapp.com/files/dd85150fa6f197a9a7594bc483d16b52.pdf

U18865-C06-0013,01 (Calibration column): Approved, no resubmittal required.

The ammoinum sulfate skid is virtually identical to the other chemical skids that were already built and delivered. I will confirm once we update the sulfuric drawing if the sulfuric acid skid anchorage remains the same. I see no reason it would change, but since it would be a different skid, we are running it past the structural engineer.

The sulfuric skid that was quoted assumed a concentration of 78%. The CPVC piping and valve/fitting materials for the quoted sulfuric skid have a "fair" rating for 93%-98% sulfuric. That is not to say "unacceptable," but it would be much safer to use PVDF/PFA/Viton (fluoro) materials.

Changing all the valves, fittings and exposed materials would be a change order as fluoro is much more expensive. The amount would not be insignificant. From our review of the material and the amounts of each (valves, fittings), I can say it would be upwards of \$9000. Would that be acceptable?

PCO-029

PCO-29	
Design Adjustment: RFI-094 WML COP-029	Solids Feed Pump TE/TSH Thermocouple Elements

Engineer response to RFI-094 confirmed that thermocouple temperature elements are required on the motors of the Solids Feed Pumps for monitoring pump flow and motor status. Contract Specification did not require these pump motors to include temperature sensors.

Design and Scope Changes:

- Temperature elements for monitoring the pump stator temperature and are to be tied into plant SCADA as shown on PI-20. These elements and associated controllers should be provided by the pump supplier.
- Note that the contract documents (PI-20, E-24, CE-08 and CE-19) shows the contractor's responsibility for connecting these elements to the LCPS and the only change to the work is the inclusion of the temperature elements and controllers from the pump supplier).

Cost Impact:

MWHC recommends a contract cost increase of \$2,354.10 to be executed in a change order for changes to the motors of the Solids Feed Pumps.

Email: mbonser@wmlylesco.com

Subject: Solids Feed Pumps TE/TSHs

Reference: E-24, PI-20 Specification (Section and Page): 432357

REQUEST

Information is requested as follows:

P&ID drawing PI-20 shows temperature elements TE-8101, 8102 & 8103 on the solids feed pumps. Each TE has a corresponding TSH in LCP-8101. Drawing E-24 shows a signal coming from a "pump bearing thermocouple" going to a thermocouple controller inside of LCP-8101.

Specification section 432357 does not provide any information on the TEs or corresponding TSHs for the sludge pumps. Please provide a specification or information on these items and clarify the purpose of them.

Information Requested By (Name): W.M. Lyles Co. **Date:** 09/25/2019

Response Requested By (Date): 10/02/2019

Received by CM (Date):

RESPONSE

Response to Information Request:

The temperature elements shown are for monitoring the pump stator temperature and are to be tied into plant SCADA as shown on PI-20. These elements and associated controllers should be provided by the pump supplier. See the attached cutsheets for reference in specifying the equipment.

Note that the contract documents (PI-20, E-24, CE-08 and CE-19) shows the contractor's responsibility for connecting these elements to the LCPS and the only change to the work is the inclusion of the temperature elements and controllers from the pump supplier.

Response By (Name): D. Stephens, AQUA Engineering Date: 10/7/19

Re: BEAUMONT, CITY OF SALT MITIGATION PROJ.

Bid Date: 8/1/18 @ 3 PM

Dear Adam,

We are pleased to offer the following for your consideration:

4 432357 PROGRESSING CAVITY PUMPS	\$1,881.00
A D D D D D D D D D D D D D D D D D D D	
ADDER FOR RUN DRY PROTECTION	
Run Dry Protection consists of a temperature prove mounted in the stator and a temperature controller Omron E5CSV-R1T provided loose for customer to mount in their control panel. Three (3) units of cast iron construction, 1800 RPM, TEFC	
Motor, Class F insulation, rated for 250gpm @ 50psi, in line base plate mounted, Start Up and Training Assistance as manufactured by NETZSCH. Please see the attached manufacturers' scope letter for details.	

Note:

GENERAL NOTES:

- 1. No taxes included in above pricing
- 2. Pricing valid for thirty (30) days from date of bid.

- 3. Price is F.O.B. factory with freight to jobsite included. Freight charges cannot be broken out of pricing.
- 4. Proposal subject to GMI Terms & Conditions attached and/or terms and conditions of individual companies quoted.
- 5. If this proposal makes reference to certain section numbers in the specifications, these are listed for reference only. We will not be responsible for furnishing all the equipment in these sections, but only that equipment which is specifically listed in our proposal; nor will we furnish any items of equipment which are omitted from the engineer's drawings or specifications unless specifically listed in our proposal.
- 6. It is the contractor's responsibility to thoroughly review the individual supplier's scope letters to ensure that they are in compliance with the specifications and all addenda. Neither Gierlich-Mitchell, Inc., nor their suppliers will be held responsible for any deficiencies between the manufacturer's proposal and the specifications, including all addenda.

Thank you for giving us the opportunity to quote you on this project. If you have any comments or questions, please feel free to contact our office at (714) 236-6070.

Respectfully yours, **GIERLICH-MITCHELL, INC.**

Tim Brekke Sales Engineer

TERMS AND CONDITIONS OF SALE

Proposal No.

- 1. ACCEPTANCE. This proposal is submitted to Purchaser subject to the terms and conditions hereinafter set forth. There are no agreements or representations, verbal or otherwise, outside of this proposal. Upon the acceptance hereof by Purchaser by signing an acceptance copy of this proposal and returning the same to Seller and upon execution of this proposal by an authorized representative of Seller, this proposal shall become a binding contract
- 2. DELIVERIES. GIERLICH-MITCHELL, Inc. shall not be liable for delays in delivery due to fire, flood, natural causes, labor trouble (including strikes, slowdowns and lockouts), war, Government regulation, riot, civil disorders, interruption of or delay in transportation, power failure, inability to obtain materials and supplies, accidents, acts of God, or any other cause beyond Seller's reasonable control. Please let us know the delivery date required for this equipment. We will process this order using all means possible to insure "on time" delivery. Any information regarding delays in your schedule that will affect our equipment, must be made available to us. In most instances, our factories can delay shipment of equipment within reasonable limits to meet a revised schedule. Job delay information not passed on to us in time for us to reschedule delivery will not be considered sufficient cause to delay payment to us. If shipment is delayed at request of Purchaser or by Governmental actions, payment becomes due when the factory is ready to make shipment.
- **3. PAYMENT.** Terms are 15% upon submittal approval, 85% Net 30 days from date of shipment invoice. Interest charges of 1.5% per month will be added to any past due invoices. Seller may ship on a "when ready" basis and partial invoice that equipment shipped. Partial invoices are bound by the same terms and conditions as those invoices submitted upon complete shipment of equipment.
- **4.** BACKCHARGES not authorized by GIERLICH-MITCHELL, INC. written purchase order will not be honored.
- 5. **RETENTIONS** not previously approved in writing by GIERLICH-MITCHELL, INC. will not be honored.
- **6. RESPONSIBILITY**. GIERLICH-MITCHELL, INC. shall not be responsible for damage to equipment if misused, stored or improperly installed. GIERLICH-MITCHELL, INC. SHALL NOT BE LIABLE FOR CONSEQUENTIAL, LIQUIDATED OR OTHER SPECIAL DAMAGES, CONSEQUENTIAL DAMAGES FOR THE PURPOSES OF THIS AGREEMENT SHALL INCLUDE BUT NOT BE LIMITED TO, LOSS OF USE, INCOME OR PROFIT, OR LOSS OF DAMAGE TO PROPERTY (INCLUDING, BUT WITHOUT LIMITATION, PRODUCTS MANUFACTURED, PROCESSED OR TRANSPORTED BY THE USE OF THE EQUIPMENT) OCCASIONED BY OR ARISING OUT OF THE OPERATION, USE, INSTALLATION, REPAIR OR REPLACEMENT OF THE EQUIPMENT OR OTHERWISE. Breach of any term or condition of this contract shall not be deemed to invalidate the remainder of this contract.
- 7. WARRANTY. For benefit of the original user, GIERLICH-MITCHELL, INC., warrants all new equipment to be free from defects in material and workmanship; and will replace or repair, F.O.B. at its factories or other location designated by it, any part or parts returned to it which GIERLICH-MITCHELL, Inc. examination shall show to have failed under normal use and service by the original user within one year following initial shipment to the Purchaser. This warranty does not cover parts damaged by maintenance, installation, modification or adjustment. Such repair or replacement shall be free of charge for items except for those items that are consumable and normally replaced during maintenance.

THIS WARRANTY IS EXPRESSLY MADE BY GIERLICH-MITCHELL, INC. AND ACCEPTED BY PURCHASER IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, EXPRESS, IMPLIED OR STATUTORY.

This warranty shall not apply to equipment or parts thereof which have been altered or repaired without GIERLICH-MITCHELL, INC. authorization or damaged by improper installation or application, or subject to misuse, abuse, neglect or accident. This warranty applies only to equipment manufactured and sold by GIERLICH-MITCHELL, INC. In cases where equipment is manufactured by others, the manufacturer's warranty shall take precedence.

- **8. TAXES.** Prices are exclusive of all taxes, federal, state, local of any kind of nature.
- **9. PRICE PROTECTION.** Unless otherwise set forth herein, prices are firm based upon the following conditions:
 - a. Receipt of a valid order within thirty (30) days from date or proposal.
 - b. Receipt of drawings and specifications necessary to proceed within one week of purchase order.
 - c. Receipt of customer's complete written approval and release for production within four weeks after approval drawings are submitted by GIERLICH-MITCHELL, INC.

Prices will be increased a maximum or one percent per month for any additional time required by contractor.

- **10. TRANSPORTATION.** Unless otherwise set forth herein, all prices are F.O.B. our factories with full freight allowed. The consignee must report all claims for damages in transit to the carrier.
- 11. COMPLIANCE WITH LAWS. Purchaser shall be solely responsible for securing any necessary permits under and for compliance with all safety, health, sanitation and other laws, ordinances and regulations in connection with the installation and operation of the equipment.
- 12. INDEMNIFICATION. It is understood that Seller has relied upon data furnished by and on behalf of Purchaser with respect to the safety aspects of the equipment and that is Purchaser's responsibility to assure that the equipment will, when installed and put in use, be in compliance with safety requirements fixed by law and otherwise legally adequate to safeguard against injuries or damage to persons or property. Purchaser hereby agrees to defend, indemnify and hold harmless Seller, its' agents and employees, against any and all losses, costs, damages, claims, liabilities or expenses, including but not limited to reasonably attorney's fees arising out of or use or operation of the same, except claims for repair or replacement of defective parts as provided in Paragraph 7 hereof.
- **13. RETURN GOODS.** Goods may not be returned without previous written permission. Returned material must be sent prepaid and is subject to a re-stocking charge.
- **14. CANCELLATION.** The purchaser may cancel his order only upon written notice and payment of reasonable cancellation charges, taking into account expenses, commitments already made, and anticipated profit.
- **15. TITLE.** Title to equipment specified herein, and to any and all additions and accessories thereto and substitutions therefore, shall remain with Seller until the purchase price thereof is paid in full.
- **16. LIEN INFORMATION.** Please provide if applicable.

This signed acceptance of this quotation constitutes a contract and order to purchase in accordance with all Terms and Conditions referred to herein. Buyers purchase order is acceptable, providing purchase order references Terms and Conditions contained herein.

NETZSCH Pumps North America, LLC. NETZ5[H

STP3 TEMPERATURE PROBE

The Temperature Sensors is a sensor element PT100 that converts the temperature of the fluid into an electrical signal.

Temperature Sensor - PT100

Characteristics:

Construction: 316 stainless steel rod. Temperature ranges: -50 ... + 250 ° C. Electrical connection: DIN 43650 connector

Electrical Terminal: 3 Wire Sensor element: PT100

Accuracy: Class A Protection: IP-65

Advantages

High reliability.

Construction and optional special assemblies.

Transmitter in the head. Thread as specified.

Applications

Temperature measurement in industrial processes.

Tel: +1 610-363-8010 Fax: +1 610-363-0971

Email: customerservice.npa@netzsch.com

Temperature Controllers

CSM_E5CSV_DS_E_7_3

Easy Setting Using DIP Switch and Simple Functions in DIN 48 × 48 mm-size **Temperature Controllers**

- · Easy setting using DIP switch.
- · Models with two alarms added to Series, ideal for temperature alarm applications.
- · Universal-input (thermocouple/platinum resistance thermometer) models also available.
- · Clearly visible digital display with character height of 13.5 mm.
- · Models available with black in addition to white cases.
- RoHS compliant.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Refer to Safety Precautions for All Temperature Controllers.

Refer to E5CS/E5CSV Operation for operating procedures.

Specifications

■ Ratings

Supply vo	oltage	100 to 240 VAC, 50/60 Hz 24 VAC, 50/60 Hz; 24 VDC						
Operating voltage range		85% to 110% of rated supply voltage						
Power consumption		100 to 240 VAC: 5 VA 24 VAC: 3 VA, 24 VDC: 2 W						
Sensor input		Thermocouple input type: K, J, L Platinum resistance thermometer input type: Pt100, JPt100 Universal-input (thermocouple/platinum resistance thermometer) type: K, J, L, T, U, N, R, Pt100, JPt100						
Control output Voltage output (for driving the SSR)		SPST-NO, 250 VAC, 3A (resistive load)						
		12 VDC, 21 mA (with short-circuit protection circuit)						
Control method		ON/OFF or 2-PID (with auto-tuning)						
Alarm output		SPST-NO, 250 VAC, 1A (resistive load)						
Setting m	nethod	Digital setting using front panel keys						
Indication	n method	7-segment digital display (character height: 13.5 mm) and deviation indicators						
Other fun	nctions	Setting change prohibit (key protection) Input shift Temperature unit change (°C/°F) Direct/reverse operation Temperature range, Sensor switching (K/J/L, Pt100/JPt100) Switching is performed between a thermocouple and platinum resistance thermometer for universal-input models. Control period switching 8-mode alarm output Sensor error detection						
Ambient o	operating temperature	-10 to 55°C (with no condensation or icing); with 3-year guarantee: -10 to 50°C						
Ambient o	operating humidity	25% to 85%						
Storage to	emperature	-25 to 65°C (with no condensation or icing)						

Note: 1. Do not use an inverter output as the power supply. (Refer to Safety Precautions for All Temperature Controllers.)

2. Models for 24 VAC/DC can also be manufactured.

■ Characteristics

Setting accuracy		Thermocouple (See note 1.):	(±0.5% of indication value or ±1°C, whichever is greater) ±1 digit max.						
Indication accuracy (ambient temperature)	re of 23°C)	Platinum resistance thermometer (See note 2.)): (±0.5% of indication value or ±1°C, whichever is ğreater) ±1 diğit max.						
Influence of tempera	ature		of PV or ±10°C, whichever is greater) ±1 digit max.						
Influence of voltage		Other thermocouple inputs: (±1%) Platinum resistance thermometer inputs: (±1%)	of PV or ±4°C, whichever is greater) ±1 digit max. of PV or ±2°C, whichever is greater) ±1 digit max.						
Hysteresis (for ON/OFF control)		0.2% FS (0.1% FS for universal-input (thermocouple/platinum resistance thermometer) models)							
Proportional band (P)		1 to 999°C (automatic adjustment using auto-to-	uning/self-tuning)						
Integral time (I)		1 to 1,999 s (automatic adjustment using auto-	tuning/self-tuning						
Derivative time (D)		1 to 1,999 s (automatic adjustment using auto-	tuning/self-tuning)						
Alarm output range		Absolute-value alarm: Same as the control range Other: 0 to input setting range full scale (°C or °F) Alarm hysteresis: 0.2°C or °F (fixed)							
Control period		2/20 s							
Sampling period		500 ms							
Insulation resistance		20 MΩ min. (at 500 VDC)							
Dielectric strength		2,000 VAC, 50/60 Hz for 1 min between current-carrying terminals of different polarity							
Vibration Malfunction resistance Destruction		10 to 55 Hz, 20 m/s2 for 10 min each in X, Y, ar	nd Z directions						
resistance	Destruction	10 to 55 Hz, 0.75-mm single amplitude for 2 hr each in X, Y, and Z directions							
Shock resistance Malfunction		100 m/s² min., 3 times each in 6 directions							
	Destruction	300 m/s2 min., 3 times each in 6 directions							
Life expectancy	Electrical	100,000 operations min. (relay output models)							
Weight		Approx. 120 g (Controller only)							
Degree of protection	1	Front panel: Equivalent to IP66; Rear case: IP20; Terminals: IP00							
Memory protection		EEPROM (non-volatile memory) (number of writes: 1,000,000)							
EMC		EMI Conducted: ESD Immunity: E Radiated Electromagnetic Field Immunity: E Conducted Disturbance Immunity: Noise Immunity (First Transient Burst Noise): E Burst Immunity:	2 kV power-line (level 3), 1 kV l/O signal-line (level 3) EN 61000-4-5: Power line: Normal mode 1 kV; Common mode 2 kV						
			Output line (relay output): Normal mode 1 kV; Common mode 2 kV EN 61000-4-11 0.5 cycle, 100% (rated voltage)						
Approved standards		UL 61010-1 (listing) CSA C22.2 No.1010-1							
Conformed standard	is	EN 61326, EN 61010-1, IEC 61010-1 VDE 0106 Part 100 (finger protection), when the	he terminal cover is mounted.						

Note: 1. The following exceptions apply to thermocouples.

• U, L: ±2°C ±1 digit max.

• R: ±3°C ±1 digit max. at 200°C or less

2. The following exceptions apply to platinum resistance thermometers. Input set values 0, 1, 2, 3 for ESCSV: 0.5% FS ±1 digit max.

■ Temperature Range

Thermocouple Input Models

Input	К					J/L				
Temperature 1,000 range 900 (selected 700 using switch) 500 (Default setting: 2) 200	200	300	400	500	600	999	200	300	400	500
Setting number	0	0	2	0	0 4	5	6	7	0 8	9
Minimum setting unit			1	C				19	C	

The shaded value indicates the default setting status.

Platinum Resistance Thermometer Input Models

Temperature Input					JPt100	VPt100				
range 500 (selected 400					200	300	400	300	400	199.9
using switch)	50	50.0	80	99.9	200		-88-			100.0
(Default setting: 3)	-50	0.0	-20	0.0	0	0	0	0	0	0.0
Setting number	0	1	2	3	4	5	6	7	8	9
Minimum setting unit	1°C	0.1°C	1°C	0.1°C			1°C			0.1°C

The shaded value indicates the default setting status.

Universal-input (Thermocouple/Platinum Resistance Thermometer) Models

• Using Thermocouple Sensors, Control Mode Switch 5: OFF

Input	1	K		J	L		T	U	N	R
1,700 1,500	1,300	199.9	850	199.9	850	400	199.9	400	1,300	1,700
100 0 -100 Setting number	-99 O	0.0	-99 2	0.0	-99 4	-99 5	6	-99 7	-99 8	9
Minimum setting unit	1°C	0.1°C	1°C	0.1°C	19	C	0.1°C		1°C	

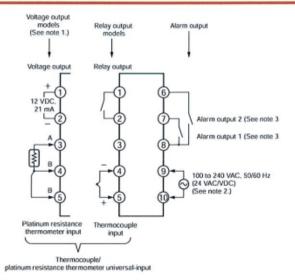

The shaded value indicates the default setting status.

• Using Platinum Resistance Thermometers, Control Mode Switch 5: ON

Input			Pt100					JPt100		
Temperature range (selected using switch) (Default setting: 0) 200 -100	-99	199.9	99	200	400	500	199.9	99	200	400
Setting number	0	1	2	3	4	5	6	7	8	9
Minimum setting unit	1°C	0.1°C		1	C		0.1°C		1°C	

The shaded value indicates the default setting status.

External Connection Diagram

Note: 1. The voltage output (12 VDC, 21 mA) is not electrically isolated from the internal circuits. When using a grounding thermocouple, do not connect output terminals 1 or 2 to ground. Otherwise, unwanted current paths will cause measurement errors.

- 2. Models with 100 to 240 VAC and 24 VAC/VDC are separate. Models using 24 VDC have no polarity.
- 3. The number of alarm outputs depends on the model.

Nomenclature

E5CSV Models with Terminal Blocks

Dimensions

Note: All units are in millimeters unless otherwise indicated.

■ Controller

E5CSV

Note: Terminals cannot be removed.

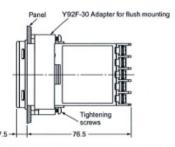

Panel Cutout Dimensions

E5CSV + Adapter for Flush Mounting (Provided)

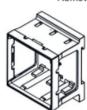

Note: 1. The recommended panel thickness is 1 to 4 mm.

2. Group mounting is possible in one direction only.

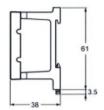

DIN Track Mounting Adapter

Y92F-52 Note: This Adapter cannot be used together with the Terminal Cover. Remove the Terminal Cover to use the Adapter.

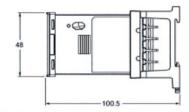

■ Accessories (Order Separately)

Hard Protective Cover

The Y92A-48B Protective Cover (hard type) is available for the following applications.

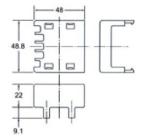

- . To protect the set from dust and dirt.
- · To prevent the panel from being accidentally touched causing displacement of set values.
- · To provide effective protection against water droplets.

Terminal Cover

E53-COV10

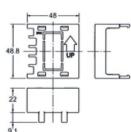

E53-COV17

(For Controllers after the design change scheduled for October 2010)

Rubber Packing

Y92S-29 (for DIN48 × 48)

Order the Rubber Packing separately if it becomes lost or damaged. The Rubber Packing can be used to achieve an IP66 degree of protection for models with terminal blocks.

(Deterioration, shrinking, or hardening of the rubber packing may occur depending on the operating environment. Therefore, periodic replacement is recommended to ensure the level of waterproofing specified in NEMA4. The time for periodic replacement depends on the operating environment. Be sure to confirm this point at your site. Consider one year a rough standard. OMRON shall not be liable for the level of water resistance if the customer does not perform periodic replacement.)

The Rubber Packing does not need to be attached if a waterproof structure is not required.

Safety Precautions

Refer to Safety Precautions for All Temperature Controllers. Refer to E5CS/E5CSV Operation for operating procedures.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527

In the interest of product improvement, specifications are subject to change without notice.

Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES. EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- · Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- · Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2012.12

In the interest of product improvement, specifications are subject to change without notice.

Solids Handling Building Changes

Owner Requested Changes:

The chemical storage equipment is being upgraded to provide a more cost-effective bulk chemical delivery and an improved chemical handling system inside the Solids Handling Building.

Design and Scope Changes:

This clarification addresses changes to the design in the Solids Handling Building, including the replacement of the (3) storage totes in the previous design with a polymer bulk storage tank. The current specification section 434143, HDXLPE Storage Tanks, applies to the new polymer tank. The tank characteristics are as follows:

Tag Number: ME-8601 Chemical Stored: Polymer

Capacity: 6650 gal Diameter: 10'-2" Height: 14'-3" Heat Tracing: No Insulation: No

Fitting Materials: Bellows Transition (base drains only)/B.O.S.S./PVC/SS/EPDM

Equipment associated with the storage tank has been added, including a progressive cavity pump for polymer recirculation (P-8603). The current specification section 432357, Progressing Cavity Pumps, applies to this new pump with the following exception: The pump shall be designed for continuous and intermittent pumping of dewatering polymer, as opposed to the pumping of sludge, as described in section 1.1.A.1.

Modifications have been made to the floor drain system and one of the radiant heaters, to accommodate these changes. Additionally, one of the overhead doors has been removed.

Portions of the mezzanine have been removed, including one of the staircases. Other minor modifications have been made, associated to this removal.

Equipment has been added, and modifications have been made in the Electrical Room to accommodate these changes.

Miscellaneous electrical changes and additions are also included.

Cost Impact:

MWHC recommends a contract cost increase of \$87,549.00 to be executed in a change order for changes to the Solids Handling Building.

CHANGE ORDER NO.3

PTP #918-248-3

Location: WWTP Salt Mitigation Upgrades – Beaumont, CA

To: W.M Lyles Co. Date: 10/31/2019 Attn: Adam Hickman

Request for Change Order, Your Purchase Order No. 55.1173-4022

Please adjust the above referenced Purchase Order to reflect the following changes: Delete the south stair in the Solids Handling Bldg per Clarification 20. Note: C/O No.1 & No.2 are still out for approval. C/O No.3 will be based as if C/O No.1 & No.2 are approved.

C.O. No.1 10-02-19 Pending

Credit for removing 315 LF of toe board at the Aeration Basins.

Original Contract: = \$97,371.00

Credit = <\$720.00> Note: Received verbal approval from Oscar Mendoza 10-30-19

Revised contract: = \$96,651.00

C.O. No.2 10-18-19 Pending

Add rail at the retaining wall. No toe Board required.

Contract: 2,621 L.F. = \$97,371.00Add rail: + 126 L.F. = \$4,900.00= \$102,271.00

= \$720.00 C.O. #1 Credit Pending

Revise Contract =\$101,551.00

C.O. No.3 10-30-19 Pending

Delete stair per Clarification 20 at the Solids Handling Building Contract: 2,747L.F. =\$102,271.00 Pending with C.O. #2

Delete Rail: <u>-40 L.F.</u> <u>=<\$1,489.00></u> Revised: 2,707L.F =\$100,782.00

= \$720.00 C.O. #1 Credit Pending

ALLIED STEEL CO., INC.

Structural Steel & Miscellaneous Metal Fabricators

October 31, 2019

W.M. Lyles Co. 42142 Roick Dr. Temecula, CA 92590

Attn: Mr. Adam Hickman

Re: City of Beaumont WWTP

Subject: Solids Handling Building Changes

Clarification 20

This change eliminated one stair and supporting columns along with a portion of the platform on the Solids Handling Building for the above referenced project. The following is a cost breakdown for this change. Please note that the shop drawings is an increased cost but all else is a cost decrease.

Material credit (includes tax)	<\$ 1,330.00>
Shop labor credit (22) MH \times \$ 85.00 =	<\$ 1,870.00>
Grating credit (includes tax)	<\$ 2,930.00>
Detailing costs (8) MH x $$80.00 =$	\$ 640.00
TOTAL CREDIT	<\$ 5,490.00>

Please issue Allied Steel a change order for <<u>\$ 5,490.00></u> to eliminate this work from our subcontract.

Sincerely,

Brian P. Chapman

President

Quoted prices are based upon receipt of the total quantity for immediate shipment (48 hours). SHIPMENTS BEYOND 48 HOURS SHALL BE AT THE PRICE IN EFFECT AT TIME OF SHIPMENT UNLESS NOTED OTHERWISE. QUOTES FOR PRODUCTS SHIPPED FOR RESALE ARE NOT FIRM UNLESS NOTED OTHERWISE.

CONTACT YOUR SALES REPRESENTATIVE IMMEDIATELY FOR ASSISTANCE WITH DBE/MBE/WBE/SMALL BUSINESS REQUIREMENTS.

Seller not responsible for delays, lack of product or increase of pricing due to causes beyond our control, and/or based upon Local, State and Federal laws governing type of products that can be sold or put into commerce. This Quote is offered contingent upon the Buyer's acceptance of Seller's terms and conditions, which are incorporated by reference and found either following this document, or on the web at https://www.ferguson.com/content/website-info/terms-of-sale Govt Buyers: All items are open market unless noted otherwise.

LEAD LAW WARNING: It is illegal to install products that are not "lead free" in accordance with US Federal or other applicable law in potable water systems anticipated for human consumption. Products with *NP in the description are NOT lead free and can only be installed in non-potable applications. Buyer is solely responsible for product selection.

WATER FLOW RATE NOTICE: Lavatory Faucets with flow rates over 0.5 GPM are not allowed for 'public use' in California.

Scope Of Work / Time Extension Request

The work associated with DCM16 CLAR 20 is a change to Southern Contracting Company's scope of work in which a change in Contract Price and Time is to be considered.

Accordingly, Southern Contracting Company requests a Contract Change Order in the amount of \$11,467.67

Scope of Work is as follows:

- Provide labor and materials to install conduit and wire to the new Polymer Tank ME-8601 for the Motor and Level Element. Install LCP-8603.

This work includes changes to MCC-SH, Level Element LIT-8601. Documentation and drawing updates.

Exclusions:

-Digging, backfill, concrete formed or poured, dry packing, surface restoration, permits, inspections.

Change in time: NA

Southern Contracting reserves all rights to additional costs and time for changes not identified in the documents furnished, and is not responsible for additional costs or time for work which is not part of our contract scope of work, unless stipulated above. Should additional information or clarification be required, please contact me at your convenience.

Summary

<u>Total:</u> \$11,467.67

Reservation of Rights

This COR does not include any amount for impacts such as interference, disruptions, rescheduling, changes in the sequence of work, delays and/or associated acceleration. We expressly reserve the right to submit our request for any of these items.

Please call with any questions you may have concerning pricing or any technical questions.

Sincerely,

Colin Dightman-Kovak

Colin Dightman-Kovak Technical Systems, Inc. 1-425-678-4116

Scope of Work

Misc Equipment:

Including:

- 1. Hardware Procurement
- 2. Required Testing
- 3. O&M, drawings updates

GENERAL

- 1. TSI supplies a bill of materials, CAD-based drawings, and Operations and Maintenance Manuals for all equipment furnished by TSI.
- 2. TSI supplies the required field startup services for this project.
- 3. Panels fabricated by TSI are UL 508 labeled.

STANDARD INCLUSIONS

We provide the following unless specifically excluded on our bill of material:

- 1) Equipment shipped FOB factory with freight allowed, tailgate, destination.
- 2) Field wiring diagrams showing interconnection of field instruments and instrumentation panels.
- 3) Instruction manuals as required.
- 4) All necessary field start-up and calibration of the equipment we supply.

STANDARD EXCLUSIONS

We do NOT include the following unless specifically included in our bill of material:

- 1) Pipe, tubing, valves or fittings between the instrument and the process.
- 2) Conduit, wire or cable not an integral part of the instrument.
- 3) Mounting brackets, stanchions, supports or mounting pads not an integral part of the instrument.
- 4) Labor to install the equipment.
- 5) The Cost, (if due to local union regulations), to have local craftsman make adjustments or wiring modifications to our equipment during start-up and calibration.
- 6) Any material or services not in our quoted sections.
- 7) This proposal is based on award of a supply purchase order and does not include any of the costs associated with bonding or subcontract administration. If bonding or a subcontract is required they can be provided for additional cost.

SPECIFIC EXCLUSIONS

- 1) 2) 3)
- Installation of Panels.
 LIT-8601 is provided by others
 FVNR-P-8603 is provided by others as part of MCC-SH
