RE: Supplemental Agreement to design services for 45<sup>th</sup> & Oliver Box Replacement

Dear Ms. Stephens,

As requested, we have reviewed the costs incurred for the design of the RCB at 45<sup>th</sup> & Oliver as a separate project. After our reviewing our billed hours, the total cost of the modified design was \$18,986. Please bear in mind that the cost above does not include our original hydrology and hydraulic design, topographic surveying and final grading design. All of those fees were included in our original fee for 45<sup>th</sup> so we did not include them in this request.

FWIW, because the other work was included in the overall 45<sup>th</sup> Street project, this fee is approximately 5% of the as-bid construction cost, which is well below the standard fee for design that would normally be 10-12% for a project of this size. Please contact me should you require any additional information. We appreciate the opportunity to work with you on this project.

Sincerely,

GARVER, LLC

Kenneth W. Lee, PE  
Senior Project Manager
