

Belle Isle Police Department

Interoffice Memorandum

TO: Chief Travis Grimm
FROM: Deputy Chief Jeremy Millis
DATE: May 10, 2024
RE: Surplus of old Yamaha Outboard Motor

In January of 2023, the Belle Isle Police Department replaced the engine on MP1 (2018 Pathfinder). I request we surplus the Yamaha SHO VF200LA (Engine ID# 6CDL-1005248). The engine has approximately 1500 hours and has been sitting at Belle Isle Public Works since the repower. Attached to this memo are the engine title and three online printouts as to the current value of the engine if the city council decides to sell it.

Research another outboard motor

Go

Truck deals, pricing and values

Suggested List – We have included manufacturer's suggested retail pricing (MSRP) to assist in the financing, insuring and appraising of vessels. The MSRP is the manufacturer's and/or distributor's highest suggested retail price in the U.S.A. when the unit was new. The MSRP is furnished by the manufacturer and/or distributor and are assumed to be correct. Unless indicated, the MSRP does not include destination charges, dealer set-up, state or local taxes, license tags or insurance.

Low Retail Value — A low retail valued outboard engine will show wear and/or defects. It may have been stored outside in the elements, been neglected and require cosmetic and/or mechanical work. This classification of engine is not in running order or is in rough running condition. Low retail engines usually are not found on a dealer's lot. **Low Retail is not a trade-in value.**

Average Retail Value — An average retail valued outboard engine should be in good condition with no visible damage or defects. This category of engine should be in sound running order. The buyer may need to invest in either minor cosmetic or mechanical work.

Note: Vehicles/Vessels in exceptional condition can be worth a significantly higher value than the Average Retail Price shown.

DESCRIPTION

2018 Yamaha VF200 V MAX SHO V6 4.2L VF200LA Outboard Motor

Smart engineering makes V MAX SHO four strokes lighter and more powerful than even two-stroke competitors. Just like its big brothers, the V MAX SHO® 200 hits above its weight class.

2018 Yamaha VF200 V MAX SHO V6 4.2L VF200LA Outboard Motor

Convenience & Control

- **POWERFUL CHARGING:** With 46 amps of total alternator power at 1000 RPM and a full 50 amps from 2,500 ~ 6,000 RPM, V MAX SHO® outboards offer the kind of charging power needed to operate today's wide array of on-board electronic devices.
- **V MAX SHO® SERIES PROPELLERS:** Designed exclusively for V MAX SHO® V6 20-inch-shaft outboards, V MAX SHO Series propellers are available in one-inch pitch increments from 22 to 27 inches, for fine-tuning wide-open-throttle RPM for tournament-level performance.
- **REAL-TIME PERFORMANCE DATA:** Optional Command Link® gauges provide real-time outboard performance, boat systems and environmental data at your fingertips. Streamlined displays are designed to withstand the elements and are available in square or round style for single- or multi-engine applications.

Power & Performance

- **COMPACT & POWERFUL POWERHEAD:** Plasma-fused sleeveless cylinders are lighter and 60 percent harder than steel. They also allow us to enlarge cylinder bores without increasing their dimensions – which creates 4.2 liters of big-bore displacement, without adding weight.

- **LIGHTWEIGHT:** With a re-engineered cowling, engine bracket and lower engine pan, 20-inch-shaft models are a full 34 pounds lighter than their predecessor, the two-stroke V MAX® Series 2.
- **SMART DESIGN:** Yamaha's exclusive In-Bank Exhaust System exits downward through the center of the "V" rather than on the exterior side. This increases combustion efficiency, creating more power and torque, and also results in a more compact shape.
- **OVERALL PERFORMANCE:** This superior design—with individual intake and exhaust camshafts, larger valves than previous designs and four valves per cylinder—delivers more precise valve timing and more efficient exchange of intake and exhaust gases, for responsive power and increased fuel economy.
- **RESPONSIVE THROTTLE:** Midrange punch and instant throttle response created by Variable Camshaft Timing has to be felt to be believed.
- **OUTSTANDING FUEL ECONOMY:** Micro-textured cylinder walls increase breathing efficiency while Precision Multi-Point Fuel Injection ensures the precise amount of air and fuel necessary for optimum power and fuel efficiency. Together, they make the 4.2 liter big-bore V MAX SHO® four stroke up to 12% better fuel efficient than our two-stroke V MAX® Series 2.

Reliability & Durability

- **CLEANER FUEL:** A large, on-engine water separating fuel filter with a water sensor works in conjunction with Yamaha's 10-Micron Water Separating Fuel Filter to separate water and contaminants from the fuel before they can reach the outboard's other filters and fuel injectors.
- **CORROSION PROTECTION:** Combined with our proprietary alloy (YDC-30), our exclusive Phaze Five™ electro-deposited, anti-corrosive paint system provides a tough, five-layer barrier against corrosion. This protection is standard on all Yamaha V MAX SHO® four-stroke engines.
- **LESS MOVING PARTS:** A single timing belt uses fewer moving parts for long term reliability. Automatic belt tensioners keep proper belt tension, avoiding adjustments for added convenience.
- **PROTECTION AND POWER:** V MAX SHO® outboards have an exhaust pressure reduction system, which not only helps keep the propeller hub cooled from hot gases, but also helps provide power by transitioning those gases out of the engine during the critical hole shot and acceleration phases.

- **SMOOTH AND QUIET:** A labyrinth exhaust routes gases through a maze before they exit above the water line through an idle exhaust relief outlet. This, combined with a muffler-less design, results in unbelievably smooth and quiet operation, with a pleasing sound of power at idle.
