LAND USE CLASSIFICATION: Residential ZONING DISTRICT: _____

DETAILED VARIANCE REQUEST: Request variance of Rear setback

SECTION OF CODE VARIANCE REQUESTED ON: _____

- The applicant hereby states that the property for which this hearing is requested has not been the subject of a hearing before the Planning and Zoning Board of the kind and type requested in the application within a period of nine (9) months prior to the filing of the application. Further that the requested use does not violate any deed restriction of the property.
- By submitting the application, I authorize City of Belle Isle employees and members of the P&Z Board to enter my property, during reasonable hours, to inspect the area of my property to which the application applies.
- Applicant shall provide a minimum of ten (10) sets of three (3) photographs in support of this application as follows: at least one (1) photograph of the front of the property and at least two photographs (from different angles) of the specific area of the property to which the application applies.
- **Sec. 42-64. - Variances.** The board shall have the power to approve, conditionally approve or deny applications for variance from the terms of the Land Development Code.
  - Criteria. The board shall not approve an application for a variance from terms of the Land Development Code unless and until:
    a. A written application for a variance is submitted to the city manager or the city manager's designee on a form provided by the city clerk setting forth all of the special conditions and circumstances that exist in favor of the granting of the variance and addressing the requirements of subsections (1)d—g of this section of the criteria set forth in this section. Upon submission of the properly completed application and the appropriate fee, the city manager or the city manager's designee shall refer the application to the board.
    b. Notice of public hearing for the variance shall be given as required by the article for hearing before the board.
    c. The public hearing on the application for the variance shall be held. The applicant, the applicant's agent as evidenced by a signed writing, or the applicant's attorney shall appear before the board.
    d. It is determined that literal enforcement of the provisions of the zoning ordinances would result in unnecessary hardship and that said hardship is created by special conditions and circumstances peculiar to the land, structure or building involved, including but not limited to dimensions, topography or soil conditions.
    e. It has been determined that personal hardship is not being considered as grounds for a variance since the variance will continue to affect the character of the neighborhood after title to the property has passed and that the special conditions and circumstances were not created in order to circumvent the Land Development Code or for the purpose of obtaining a variance.
    f. It is determined that the variance is the minimum variance that will make possible the reasonable use of the land, building or structure.
    g. It is determined that the granting of the variance will be in harmony with the general purpose and intent of the Land Development Code, will not be injurious to the neighborhood, will not be detrimental to the public welfare, and will not be contrary to the public interest.

The board shall find that the preceding requirements have been met by the applicant for a variance.

(2) *Violations of conditions.*

a. In granting any variance, the board may prescribe appropriate conditions and safeguards to ensure compliance with the Land Development Code. Violation of such conditions and safeguards, when made a part of the terms under which the variance is granted, shall be deemed a violation of this Land Development Code and punishable in accordance with this article. At the discretion of the board, such variance may be revoked for violation of the condition and/or safeguards.

b. The board may prescribe a reasonable time limit within which the action for which the variance is required shall be begun or completed or both. Under no circumstances, except as permitted above, shall the board grant a variance to permit a use not generally or by special exception permitted in the zoning district involved, or any use expressly or by implication prohibited by the terms of the Land Development Code in the zoning district. No nonconforming use of neighboring lands, structures or buildings in the same zoning district, and no permitted use of land, structures or buildings in other zoning districts, shall be considered grounds for the authorization of a variance.

Purpose of this letter

To file a 2'-8" variance for the address little below.

Project:

March 2,2022

4 Season Rear Lanai with covered entry
David Sutton
4221 Kezar Ct
Belle Isle, FL 32812
(407)-595-8964

City of Belle Isle,

I am applying for this variance because I want to safely enjoy my property. I have been in this home since December 1999. I have an open lanai in the back that I have wanted to enclose since the time I moved into the house. However, I have not been able to afford it until now. The purposed four-foot extension and enclosed area falls within the 35'-0" egress line. The screened in area on the west side extends beyond your code only by 2'-6". This screened in area exceeds your code specifications less than 3 feet or 20 square feet which is insignificant to the entire length of my backyard property.

The reason I need a screened in area of this size is two-fold. One, it provides a covered area that protects the entry to the enclosed area. It would allow family members and guests to come in and out of the backyard through a covered area thereby reducing the tracking of mud, grass, leaves, etc. into the house. Two, I need a sufficient open space to prevent harm to those around me when I barbeque. In addition to preventing harm to people going in and out when I barbeque, I also need sufficient space to safely barbeque without burning down the dwelling. Reducing the size of that area would be a design safety flaw.

Furthermore, my next-door neighbor on the east side has his home approximately 10 feet past this easement. His house extends way beyond what you specify in your code. The aerial view supplied shows it is the entire length of the home that is past the 35'-0" egress line. Also, if you look two doors down on the west side you can see another home that exceeds your code as well. I am sure if you looked at the homes in my neighborhood you would see many that

encroach on the 35'-0" easement. My encroachment is minor and is in harmony with the neighborhood. The space of my backyard is very large, and this addition does not negatively impact the look or function or topography of the land or neighborhood. Furthermore, the HOA has approved the plan. see enclosed letter. I respectfully request that you grant this variance.

I have included the HOA approval and an aerial view in your packets to show the neighboring home and their encroachment on this easement.

Thank you for your time and consideration,

David Sutton

   THE LIVE LOAD NEED ONLY BE APPLIED TO THOSE PORTIONS OF THE JOIST TRUSS BOTTOM CHORDS WHERE ALL THE FOLLOWING CONDITIONS ARE MET:

   1. THE ATTIC AREA IS ACCESSIBLE FROM AN OPENING NOT LESS THAN 20 INCH'S IN WIDTH AND 30 INCH'S IN LENGTH THAT IS LOCATED WHERE THE CLEAR HEIGHT IN THE ATTIC IS NOT LESS THAN 30 INCH'S.
   2. THE SLOPES OF THE JOIST OR TRUSS BOTTOM CHORDS ARE NOT GREATER THAN 2 INCH'S VERTICAL AND 12 UNITS HORIZONTAL.
   3. REQUIRED INSULATION DEPTH IS LESS THAN THE JOIST OR TRUSS BOTTOM CHORD MEMBER DEPTH.

   THE REMAINING PORTIONS OF THE JOIST OR TRUSS BOTTOM CHORDS SHALL BE DESIGNED FOR A UNIFORMLY DISTRIBUTED CONCURRENT LIVE LOAD OF NOT LESS THAN 10 POUNDS PER SQUARE FOOT.

h. GLAZING USED IN HANDRAIL ASSEMBLIES AND GUARDS SHALL BE DESIGNED WITH A SAFETY FACTOR OF 4. THE SAFETY FACTOR SHALL BE APPLIED TO EACH OF THE CONCENTRATED LOADS APPLIED TO THE TOP OF THE RAIL AND TO THE LOAD ON THE IN-FILL COMPONENTS. THESE LOADS SHALL BE DETERMINED INDEPENDENT OF ONE ANOTHER, AND LOADS ARE ASSUMED NOT TO OCCUR WITH ANY OTHER LIVE LOAD.
