

**ARBORCARE TREE EXPERTS INC**

February 13, 2025

Good morning, Ansley,

Upon inspection at 1 Garfield Way, Bluffton, SC 29910, there is (1) tree that needs attention. Located on the left side of the property is (1) Co-dominant Live Oak Tree. At the base the measurement is less than 24" in diameter. One lead of the tree has broken off and therefore has caused rotting of the base. It is my recommendation that this tree be removed before new construction begins. The health of the tree will continue to decline which will be hazardous to the newly constructed home in the future. Please let me know if you have any questions.

Sincerely,

James Yirka
