Comprehensive Plan Amendment **(Future Land Use Map)**

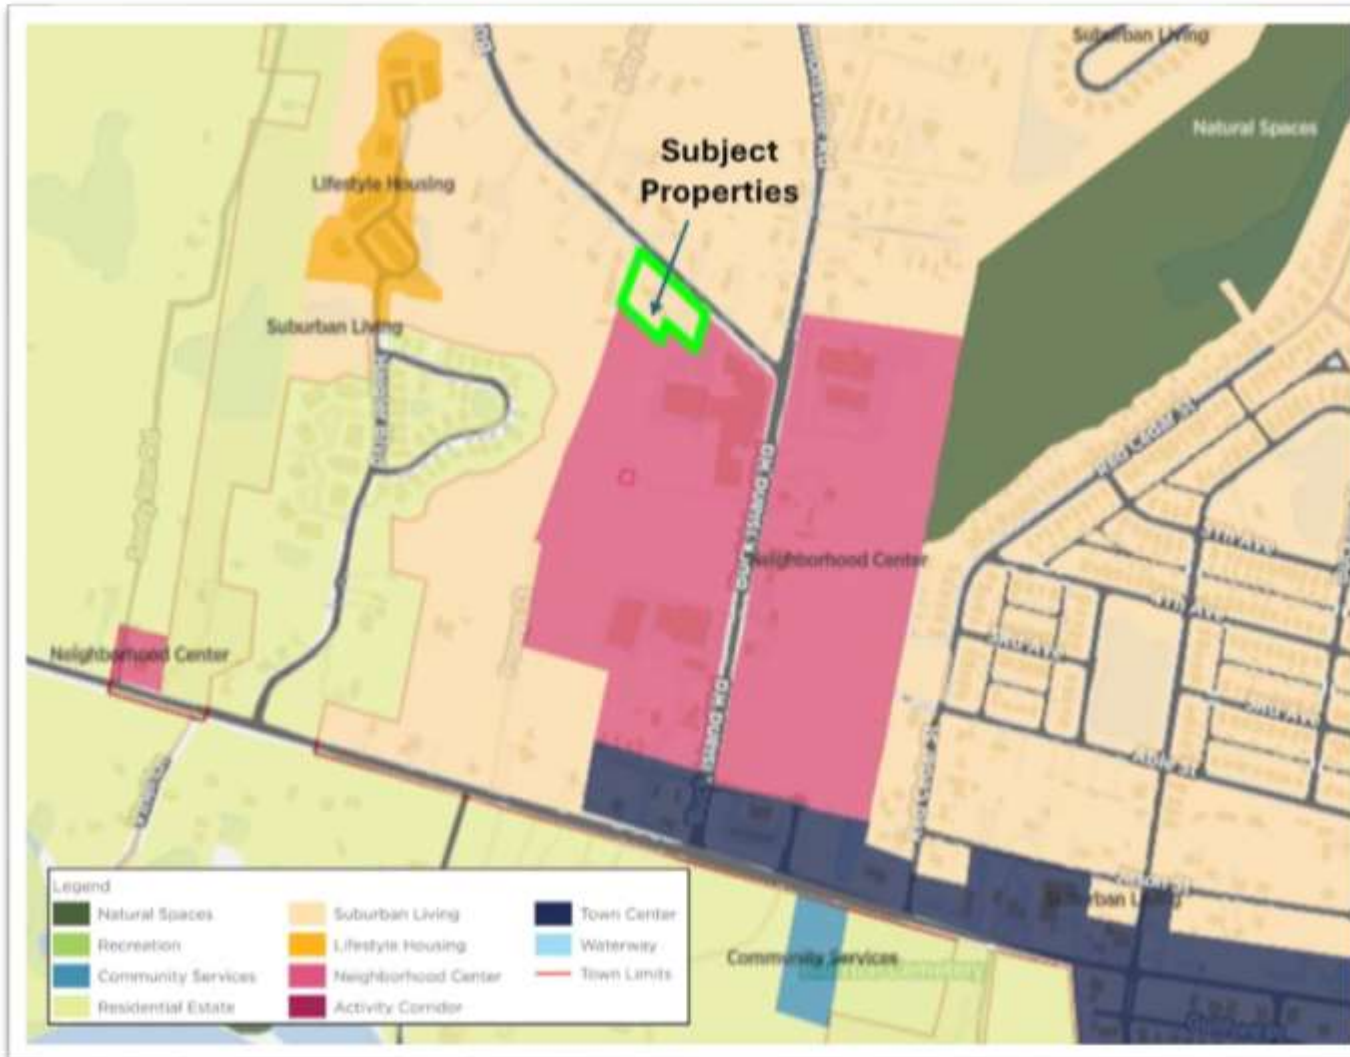

Current

Suburban Living - Intended to include low density single-family neighborhoods. Much of this category includes portions of large Planned Unit Developments that are under active construction or are built-out. Allowable density is up to three dwelling units per acre and must be at least one dwelling unit per acre. Community amenities such as trails, parks, and centralized swimming pools are encouraged.

Proposed

Neighborhood Center — Intended to guide emerging neighborhood-focused retail clusters throughout the community. These centers, such as Buckwalter Place, provide the opportunity for residents to be within walking distance of grocers, restaurants, retailers, and medical offices. These centers help establish neighborhood identity and are best served when supported by a mix of middle housing and single-family residences within walking or biking distance.

Zoning Map Amendment

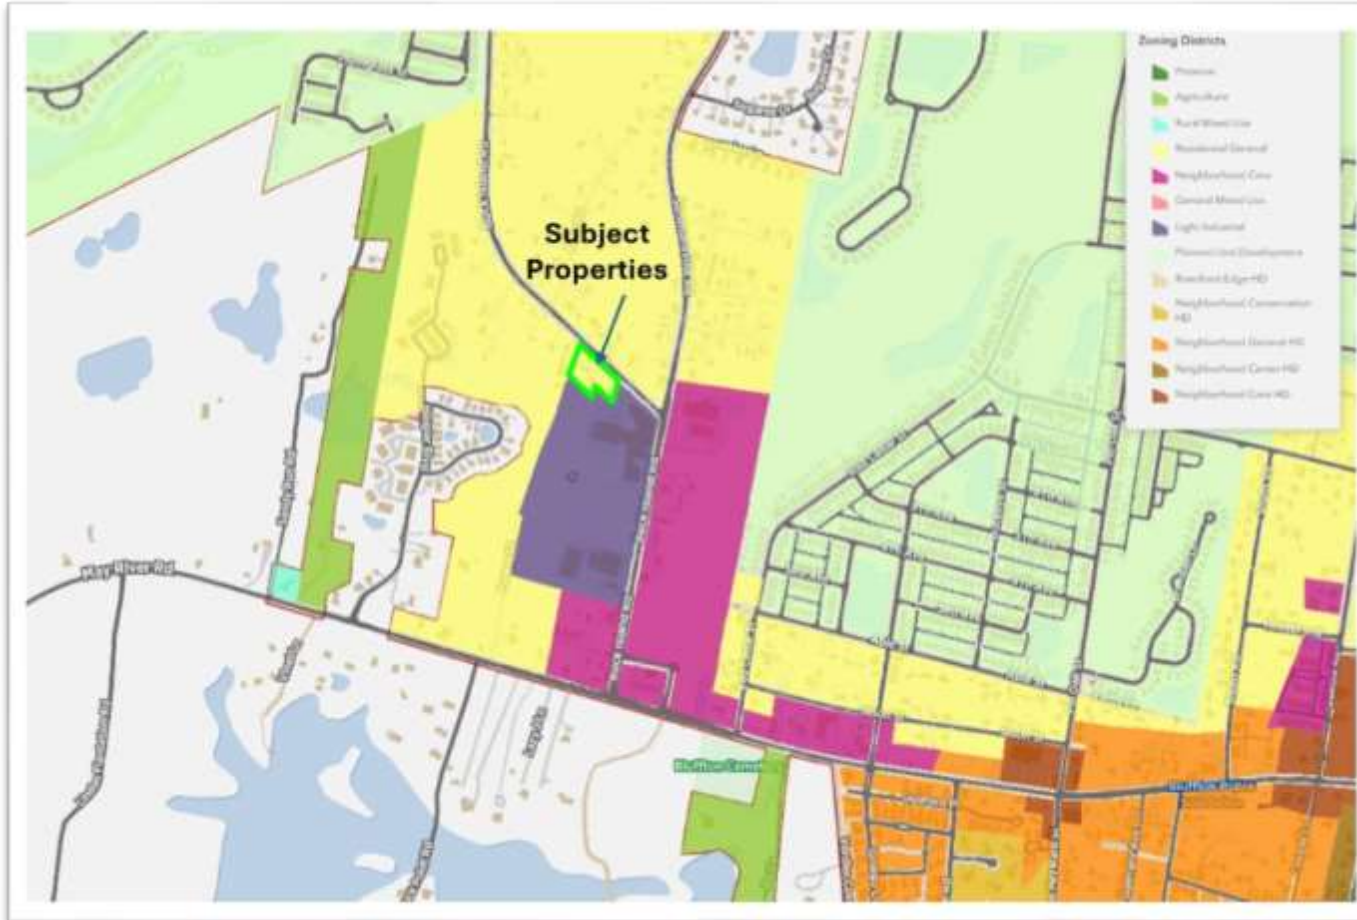

Current

Residential General (RG) - Intended to provide for moderate-density residential neighborhoods. This district will include a range of dwelling types in an integrated neighborhood setting with other civic and recreational uses.

Proposed

Light Industrial (LI) - Intended to provide locations for light industrial, research and development, assembly, high technology production, precision manufacturing, and similar primary employment uses. This district can be used to integrate a number of mutually supportive uses within the district to create employment centers.
