<b>Strategic Focus Area &amp; Guiding Principle</b>					<b>Project Status</b>				
<p><i>Economic Growth</i>  <i>Guiding Principle #6:</i> Support place-based economic development strategies that invest in public amenities to enhance our quality of life and thereby drive economic growth.</p> <p><i>Infrastructure</i>  <i>Guiding Principle #3:</i> Establish long-term planning, prioritization and investment strategies for future infrastructure and facilities that improve the quality of life for citizens while being financially sustainable.</p>					<p>Engineering design and permitting is planned to be substantially complete in FY25, subject to completion of the Dominion powerline design. Easement acquisition for streetscape and underground burial is to begin in FY26. Phased construction is planned to follow the completion of the Boundary Street Streetscape project in FY27. Construction start is dependent on the acquisition of approximately 70 easements for underground power encroachments and service connections.</p>				
<b>Project Origination</b>					<b>Project Performance Measures</b>				
<p>1) Calhoun Street and Adjacent Area Study, adopted by Town Council in 2016, 2) Old Town Master Plan, 3) Transportation Chapter of the 2014 Comprehensive Plan; and 4) FY20-21 Strategic Plan.</p>					<p>The Comprehensive Plan promotes the provision for parking, open space, interconnectivity, pedestrian access, and other matters related to the study work area. Project goal is to increase the Town's walk score and encourage private investment in the Historic District.</p>

<p>As sanitary sewer is extended throughout the Town's jurisdiction, additional connections will follow. Construction of sewer connections will involve coordination with BJWSA and available trunk lines. The Sewer Connection and Extension Policy prioritizes sewer extension and connection to currently unserved areas within a 500' buffer of the May River and Coves in the Town's jurisdiction, supported by Microbial Source Tracking results. As these CIP projects come to completion, infill areas outside of the 500' buffer will be served as funds become available.</p>

## Capital Improvements Program Project Data Sheet

<b>Project Name</b>	Bridge Street Streetscape			<b>Project #</b>	S0008
<b>Program Type</b>	Stormwater & Sewer	<b>Project Manager</b>	Constance Clarkson	<b>Start to End</b>	FY2020 - FY2026

## Project Scope

Bridge Street is a major east-west connector road in the Historic District that parallels the May River. This project includes the planning and construction of new streetscape improvements to include drainage improvements, sidewalks, on-street parking, street lighting, crosswalks, and ADA compliance improvements on Bridge from Burnt Church Road to Thomas Heyward Road. The project has been implemented in two phases. Phase 1 included streetscape improvements from Burnt Church Road to Calhoun Street and Phase 2 is located west of Calhoun Street to Thomas Heyward Road. Street lighting will be similar to the lighting used throughout the Historic District. The goal is to improve overall pedestrian circulation and safety in the Historic District. The result will be a stormwater retrofit that will reduce runoff including bacteria and other local pollutants of concern and improve overall water quality of the May River.

### Strategic Focus Area & Guiding Principle

*Economic Growth*  
*Guiding Principle #6:* Support place-based economic development strategies that invest in public amenities to enhance our quality of life and thereby drive economic growth.

*Infrastructure*  
*Guiding Principle #3:* Establish long-term planning, prioritization and investment strategies for future infrastructure and facilities that improve the quality of life for citizens while being financially sustainable.

## Project Status

Phase 1 construction was completed in FY24. Phase 2 design was completed in FY25. Phase 2 construction will start in FY25 with completion in FY26.

## Project Origination

FY19-20 Strategic Plan.

## Project Performance Measures

The Comprehensive Plan promotes the provision for parking, interconnectivity, pedestrian access, and other matters related to the Historic District area. Project goal is to increase the Town's walk score, improve pedestrian safety and protect the May River.

<b>Program Type</b>	Stormwater & Sewer	<b>Project Manager</b>	Dan Rybak			<b>Start to End</b>	FY2022 - FY2026		
<b>Project Scope</b>					<b>Project Photo or Map</b>				
<p>This project consists of Drainage Infrastructure inventory, assessment and watershed analysis within Crooked Cove and Guerrard Cove. An overall inventory and assessment of storm drain features to include storm drain lines, storm drain inlets, manholes, structures, ditches/channels and other stormwater conveyance systems to determine if they are providing adequate drainage conveyance and/or functioning as designed. Development of a 2D hydrologic/hydraulic model of primary drainage network systems will be developed to determine inundation zones from storm events of different magnitude and help identify "choke" points and areas of needed drainage improvement. Upon completion of the overall assessment, a list of individual project improvements will be established, prioritized and broken out by asset owner to identify work (maintenance and CIP) that is needed to be done and implemented by each. This CIP was originally initiated in FY22 for all watersheds in municipal limits to be studied. Heyward Cove watershed was completed and Crooked/Guerrard Coves was in process and to be taken to completion. In FY26, it was decided to break out future work in individual projects for each watershed to be studied.</p>

<b>Project Scope</b>					<b>Project Photo or Map</b>				
<p>Planning and Design of Pritchard Street Streetscape and Drainage Improvement project was initiated FY22 subsequent to completion of Historic District Phase 1 sewer extension work and needed drainage improvements. The project will include design and construction of permitted improvements to capture and convey roadway and surface drainage to an outfall location(s) at Heyward Cove. Streetscape elements were added in FY24 and include sidewalk additions and improvement for pedestrian connectivity, ADA pedestrian compliance measures, traffic calming and street lighting. Construction will include proposed project improvements, installation of inlets and storm drain pipe, roadside channel improvements, maintenance of traffic, erosion and sediment control and appurtenances. Additionally, installation of water quality BMPs is included and supported by 319 grant funding to treat stormwater runoff from impervious surfaces.</p>

<b>Project Scope</b>					<b>Project Photo or Map</b>				
<p>As a result of the 2021 MRWAP update, 11 new project/site locations were recommended. These eleven sites were evaluated for feasibility, cost/benefit and preliminary design plans were developed for 9 sites (2 sites declined to participate) under prior year CIP. Pritchardville Elementary School has been selected to proceed to final design and construction due to it's large impervious foot print and proposed water quality benefit/pollutant removal based on site conditions, geotechnical feasibility and preliminary design results. This project will take the completed preliminary design information to final design, permitting and construction on the property. Expenditures of this and future May River Action Plan Impervious Restoration Program CIP will be supported by SWU fees, potential developer participation and/or fee-in-lieu contributions.</p>
