

TECHNICAL MEMORANDUM

To: Dan Frazier, AICP
Principal Planner
Town of Bluffton

From: Dillon Turner, PE, PTOE
Kimley-Horn

Date: January 10, 2022

Subject: *Village at Verdier Plantation IMP Amendment, Bluffton, South Carolina*

The purpose of this technical memorandum is to show traffic impacts of the proposed roadway changes compared to the initial Masterplan for the Village at Verdier Plantation. The Village at Verdier Plantation is located in the southeast quadrant of the SC 170 (Okatie Highway) at Seagrass Station intersection in Bluffton, South Carolina. The proposed roadway changes include:

- An emergency access gate at Hager Road, internal to the proposed DBA – CarVillage
- A proposed full access road with a pedestrian connection to Parcel X, north of the DBA – CarVillage
- Removal of the frontage road in the southeast quadrant of the SC 170 at Seagrass Station intersection

This technical memorandum will compare the capacity analysis at the following study area intersections:

- SC 170 (Okatie Highway) at Seagrass Station Road/Del Webb Boulevard
- Seagrass Station at Charles Cross Way/7C Access 2
 - Please note 7C is the access to Parcel X
- Pearce Road at Augustine Road
- Augustine Road at Amanda Road
- Hager Road at Augustine Road
- SC 170 (Okatie Highway) at Hager Road
- SC 170 (Okatie Highway) at Amanda Road
- Amanda Road at 7C Access 1
 - Please note 7C is the access to Parcel X

This technical memorandum considers two scenarios in the AM and PM peak hours:

- Access to Hager Road is limited to CarVillage visitors and only allowed as an emergency exit for Seagrass Station, referred to as "No Access."
- Access to Hager Road is provided for the Seagrass Station neighborhood referred to as "Access."

Existing Conditions

SC 170 (Okatie Highway) is a four-lane, divided principal arterial with a posted speed limit of 45 mph in the vicinity of the site. SC 170 (Okatie Highway) had an Annual Average Daily Traffic (AADT) of 25,100 vehicles per day in 2021. Seagrass Station Road provides access to the Seagrass Station residential development on the east side of SC 170 (Okatie Highway). Seagrass Station Road is a local roadway with a posted speed limit of 15 mph. Hager Road and Augustine Road are both local roadways that provide internal access to the Seagrass Station residential development and currently do not provide access to SC 170 (Okatie Highway).

Existing Traffic Volumes

Peak-period turning movement counts were collected at the following intersections on Thursday, November 10th, 2022 from 7:00 AM to 9:00 AM and 4:00 PM to 6:00PM:

- Seagrass Station Road and Charles Cross Way
- Hager Road and Augustine Road
- Pearce Road and Augustine Road
- Pearce Road and Amanda Road
- SC 170 (Okatie Highway) and Seagrass Station

The raw turning-movement count data are included in **Attachment B** and the traffic volume development worksheets are included in **Attachment C**.

Seagrass Station homes are considered fully built-out and occupied, and trips from this residential development are captured in the turning-movement counts.

The counts were distributed throughout the network for proposed intersections in the Village at Verdier Masterplan.

Trip Generation

Two additional developments were considered as part of this comparison. The CarVillage site and the Parcel X site were considered, with their locations and site plans provided in **Attachment A**. As determined in the CarVillage Bluffton Traffic Memo (Kimley-Horn, August 2022), low intensities and unique land uses did not require a traffic impact study. To provide a conservative estimate for this site's trip generation, 20 total trips (10 in/10 out) in the AM peak hour and 20 trips (10 in/10 out) in the PM peak hour were considered. These trips utilize SC 170 (Okatie Highway) to access the right-in right-out Hager Road to access the CarVillage site.

The development at Parcel X is projected to include the following land uses and intensities, shown in **Table 1**. It is expected to produce 80 trips in the AM peak hour (47 in/33 out) and 106 trips in the PM peak hour (49 in/57 out). Full detail on the trip generation is provided in **Attachment C**.

Table 1 – Parcel X Trip Generation Estimates

Land Use	ITE LUC	Intensity	AM Peak-Hour Trips	PM Peak-Hour Trips
Small Office Building	712	10,000 square feet	17 (14 in/3 out)	22 (7 in/15 out)
Furniture Store	890	18,000 square feet	5 (4 in/1 out)	10 (5 in/5 out)
Convenience Store/Gas Station	945	3,800 square feet / 2-8 vehicle fueling positions	154 (77 in/77 out)	184 (92 in/92 out)
Subtotal			176 (95 in/81 out)	216 (104 in/112 out)
<i>Internal Capture</i>			-4 (2 in/2 out)	-4 (2 in/2 out)
<i>ITE Pass-By</i>			-92 (46 in/46 out)	-106 (53 in/53 out)
Total Net New External Trips			80 (47 in/33 out)	106 (49 in/57 out)

Trip Distribution Comparison

For the existing masterplan, it was assumed that homes south of Burley Lane within the Seagrass Station neighborhood would utilize Hager Road off of SC 170 (Okatie Highway) and homes north of Burley Lane would utilize Amanda Road off of SC 170 (Okatie Highway).

Hager Road and Amanda Road are both anticipated to be right-in/right-out accesses off of SC 170 (Okatie Highway), therefore southbound trips accessing the Seagrass Station neighborhood would not be redistributed from their existing assignment.

The amended masterplan for the Village of Verdier removes the public access from Hager Road. Therefore, the inbound northbound trips which initially were planned to utilize Hager Road were redistributed to Amanda Road and Seagrass Station based on the exiting volume counts and existing travel patterns. The calculations are attached for this redistribution.

2027 Traffic Volumes

The analysis year for the comparison was 2027. Based upon available South Carolina Department of Transportation (SCDOT) Average Annual Daily Traffic (AADT) data for Beaufort County count stations #165, #554, and #325, an annual growth rate of 6% was assumed for this project and applied to the existing peak-hour traffic volumes for five years to develop 2027 horizon year volumes. The trip generation projections for CarVillage and Parcel X were applied to these grown traffic volumes to perform the capacity analysis comparison.

Capacity Analysis Comparison

Level-of-service (LOS) analyses were conducted using the Synchro, Version 11, traffic analysis software for the AM and PM peak hours for the intersections of study. The program uses methodologies contained in the Highway Capacity Manual (HCM), 6th Edition, to determine the operating characteristics of an intersection. **Table 2** summarizes the LOS and longest control delay on the side street approaches for the study intersections of:

- SC 170 (Okatie Highway) at Seagrass Station Road/Del Webb Boulevard
- Seagrass Station at Charles Cross Way/7C Access 2
- Pearce Road at Augustine Road
- Augustine Road at Amanda Road
- Hager Road at Augustine Road
- SC 170 (Okatie Highway) at Hager Road
- SC 170 (Okatie Highway) at Amanda Road
- Amanda Road at 7C Access 1

Table 2 – Capacity Analysis Results (LOS/Delay)

Intersection	Scenario			
	2027 Access		2027 No Access	
	AM Peak Hour LOS (Delay)	PM Peak Hour LOS (Delay)	AM Peak Hour (LOS Delay)	PM Peak Hour LOS (Delay)
Okatie Highway and Seagrass Station Road (TWSC)	F (\$)	F (\$)	F (\$)	F (\$)
Okatie Highway and Seagrass Station Road (Signal)	A (6.5)*	A (5.9)*	A (6.5)*	A (6.2)*
Seagrass Station Road at Charles Cross Way	A (9.1)	A (9.2)	A (9.1)	A (9.2)
Pearce Road at Augustine Road	A (9.5)	A (9.5)	A (9.5)	A (9.5)
Augustine Road at Amanda Road	A (8.7)	A (8.8)	A (8.8)	A (8.8)
Hager Road at Augustine Road	A (8.5)	A (8.6)	A (8.6)	A (8.7)
SC 170 (Okatie Highway) at Hager Road	C (18.9)	C (17.1)	C (17.2)	C (16.3)
SC 170 (Okatie Highway) at Amanda Road	C (19.9)	C (18.0)	C (22.1)	C (19.1)
Amanda Road at 7C Access 1	A (8.8)	A (8.7)	A (8.9)	A (8.8)

\$- Delay Exceeds 300 Seconds

* Overall Intersection Reported

The results of the analysis presented in **Table 2** indicate that under the No Access scenario, all intersections are expected to operate with similar if not the same LOS and delay under both AM and PM peak hours. The intersection of SC 170 (Okatie Highway) is projected to operate with significant delays (LOS F). With these undesirable delays, a signalized intersection was analyzed as an alternative to the existing minor street stop control. With signalized control this intersection is expected to operate at LOS A during both the AM and PM peak hours with and without access to Hager.

The Town of Bluffton recently did a signal warrant analysis at the intersection of SC 170 (Okatie Highway) at Seagrass station and it was not warranted per a discussion with SCDOT. It is recommended to continue to monitor this intersection for signalization.

Summary

The purpose of this technical memorandum is to show traffic impacts of the proposed roadway changes compared to the initial Masterplan for the Village at Verdier. The proposed roadway changes include

- An emergency access gate at Hager Road, internal to the proposed DBA – CarVillage
- A proposed full access road with a pedestrian connection to Parcel X, north of the DBA – CarVillage
- Removal of the frontage road in the southeast quadrant of the SC 170 at Seagrass Station intersection

Based on the capacity analysis, removing access to Hager Street will have a minimal impact on the surrounding roadway network. The Town of Bluffton recently did a signal warrant analysis at the intersection of SC 170 (Okatie Highway) at Seagrass station and it was not warranted per a discussion with SCDOT. It is recommended to continue to monitor this intersection for signalization.
