Step 6 Upgrades:

Roof Insulation

Wall Insulation

Roof Overhang(12") 

26 Gauge Roof

26 Gauge Wall

Closure Package 

Step 7 Shipping / Installation / Concrete :

Check for a **SHIPPING** estimate

The shipping estimate will usually be the *maximum* price that you could expect. If shipping costs are a concern, please contact us and we will see if there are ways to reduce this estimate (i.e. combining deliveries, changing drop-off location, etc...)

Check for an **INSTALLATION** estimate

Installation is available within a 175 mile radius (approximately) of our manufacturing center (Augusta, GA). Even if your location is outside of our radius, you can still request an estimate to get an idea of a typical installation cost.

Check for a **CONCRETE SLAB** information

You can choose to have your pole barn built on a concrete slab. The estimate will include the entire square footage of the barn plus lean-tos. Please contact us if you need assistance choosing the slab thickness. Please note this estimate is usually the ***maximum price*** that you could expect to pay. We can often work deals to get you a lower price!

Check to include **SALES TAX** in estimate

Choose to have sales tax included in the estimate. This sales tax only applies to materials.

Step 8 Customer Information:

Note: You will be provided a link to a parts list for this barn when you submit this form. The parts list will also contain the shipping and intallation estimate (if requested).

Time-Frame: **Immediately**
