

2026 OSEC Work Plan

The Open Space and Ecology Committee provides policy and programmatic recommendations on environmental issues.

Priority Projects:

- Provide input on Quarry and Baylands Developments, especially open space designs
- Support the health and growth of the urban tree canopy utilizing the recent Tree Inventory, via education and outreach, grants and potential other means. Consider setting a canopy coverage goal.
- Update Climate Action Plan (CAP)
 - i. Consider strategies to reduce emissions from existing buildings and transportation
 - ii. Review and recommend plans to meet Climate Emergency Declaration goals

Routine/Ongoing Efforts:

- Participate in sea level rise mitigation planning
- Two new ad-hoc subcommittees: Dark Skies/Invasive Species and Home Hardening
- Review and approve annual vegetation management plan for Brisbane Acres
- Review Open Space Plan and its implementation and update as necessary
- Provide input on three to four habitat restoration days per year
- Improve/maintain Crocker Trail frog habitat
- Education and Outreach
 - Day in the Park community festival
 - Bike to Work Day
 - Lipman Science Fair
 - Library displays
 - Publications through City e-blast, Star, website, social media sites and MCTV
 - Outreach to targeted areas, e.g. on trash
