

CITY COUNCIL AGENDA REPORT

Meeting Date: January 16, 2025
From: Director of Emergency Services
Subject: Revised Emergency Services Agreement

This Resolution is exempt from CEQA because it is not a project (CCR Title 14 §15378 (b) (2)).

Community Goal/Result: Safe Community

Purpose

To review recommended revisions to the Joint Powers Agreement that formed the San Mateo County Emergency Services Council. The Director of Emergency Services, Police Chief, and Fire Chief have reviewed the proposed second amendment and recommend its approval.

Recommendation

Adopt a resolution “Approving the Second Revised and Restated Joint Exercise of Powers Agreement – San Mateo County Operational Area Services Organization.”

Background

The San Mateo Operational Area Emergency Services Council (ESC) brings together local governments, special districts, and other entities to coordinate emergency planning and response, including for hazardous materials. This council engages in planning with respect to all phases of the emergency management cycle: prevention, protection, response, recovery, and mitigation efforts, while also maintaining key public information systems like SMC Alert.

The ESC last revised and restated the Joint Exercise of the Powers Agreement (“Agreement”) on October 17, 2014. Since the last update, the Agreement it has become outdated following significant changes within the Department of Emergency Management (DEM), which now operates as a standalone agency separate from the Sheriff’s Office.

Discussion

To accurately reflect the current responsibilities of the DEM and the ESC, the ESC unanimously approved the changes to the JPA. The City of Brisbane partners with ESC and DEM to receive services such as Hazmat Responses, Emergency Alert and Warning, and Training and Exercises for the entire Operational Area.

Key changes to the Agreement, include:

- Standardizing nomenclature;
- Updating agreement language; and
- Clarifying and defining the roles of the ESC, the ESC Finance Committee, and the DEM.

Fiscal Impact

None anticipated as a direct result of the recommended action.

Measure of Success

Continued cooperative participation in a countywide organization focused on planning related to the four phases of the emergency management cycle: preparedness, mitigation, response, and recovery.

Environmental Review

Adoption of this resolution does not need further environmental review under the California Environmental Quality Act (CEQA) as it is general policy and procedure making not applied to a specific instance and therefore it is not a “project”(California Code of Regulations, Title 14, Division 6, Chapter 3, Article 20, §15378 (b) (2)).

ANNEX A – COMMON TERMINOLOGY

A.01 Terminology Defined

Not all vocabulary of technical terms listed in the Agreement is used in the Agreement. In part, the terms are included as a resource to further clarify terminology utilized in documentation, field operations and/or applicable subject matter.

A.02 All-Hazards: The consideration of the full spectrum of emergencies (natural, technological, or human-caused incidents) that calls for action to protect life, property, and environment. The advantages of adopting an all-hazards approach to prepare for and respond to disasters include comprehensive planning, resource flexibility, coordination among agencies, training, and community engagement to effectively control different types of disasters to reduce or eliminate duplication of effort and cost.

A.03 California Governor’s Office of Emergency Services (Cal OES): State-level organization that functions as the central command center during major emergencies and disasters in California. Cal OES oversees the response, direction, and coordination of state and federal resources, as well as mutual aid assets, to support diverse communities in the state.

A.04 Catastrophe: Any incident, natural or human-caused, with consequences of high rates of mass casualties, damage, or disruption severely affecting the population, infrastructure, environment, economy, national morale, and/or government functions. A catastrophic event could result in sustained impacts over a prolonged period, exceed resources normally available in the impacted area, and significantly interrupt governmental operations and emergency services to such an extent that national security could be threatened.

A.05 Community Emergency Response Team (CERT): Community-level organizations of volunteer emergency workers who can provide immediate assistance to supplement the efforts of professional responders in the event of a major disaster. CERT programs train volunteers in disaster preparedness and basic disaster response skills during disaster situations so professional responders can prioritize and allocate resources to more complex tasks. Local CERT programs are supported by the Federal Emergency Management Agency (FEMA), as well as the California Governor’s Office of Emergency Services (Cal OES).

A.06 Command: The act or directing and or controlling by virtue of explicit legal, agency or delegated authority. The term “Command” may also refer to the Incident Commander.

A.07 Emergency: Any incident, natural, technological, or human-caused, that requires responsive action to protect life, property, and environment. Under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), an emergency means any occasion or instance for which, in the determination of the President, federal assistance is needed to supplement state and local efforts and capabilities to save lives and to protect property and public health and safety or to lessen or avert the threat of a catastrophe in any part of the United States.

A.08 Emergency Management: A subset of incident management, the coordination and integration of all activities necessary to build, sustain and improve the capability to prepare for, protect against, respond to, recover from, or mitigate against threatened or actual natural disasters, acts of terrorism or other human-caused disasters.

A.09 Emergency Operations Center (EOC): The physical location at which the coordination of information and resources to support incident management activities normally takes place. An EOC may be a temporary facility or maybe in a more central or permanently established facility, such as at a higher level of organization within a jurisdiction.

A.10 Federal Emergency Management Agency (FEMA): Federal-level organization that coordinates the federal government's response to major disasters and emergencies, providing support and resources to state and local authorities. Its role includes managing disaster relief efforts, facilitating recovery operations, and helping communities prepare for future incidents.

A.11 Incident: An occurrence or event, natural or human-caused, which requires a response to protect life or property. Incidents can, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, civil unrest, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, tsunamis, war-related disasters, public health and medical emergencies, and other occurrences requiring an emergency response.

A.12 Incident Command System (ICS): A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. It is used for all kinds of emergencies and can be applied to small as well as large and complex incidents.

A.13 Local Emergency: The duly proclaimed existence of conditions of disaster or extreme peril to the safety of persons and/or property within territorial limits of a county, city and county, or city caused by such conditions as fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, earthquake, tsunami or other conditions which are likely to be beyond the control of the services, personnel, equipment and facilities of that local political subdivision to combat.

A.14 Local Government: A county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under state law;) regional or interstate government entity or agency or instrumentality of a local government; an Indian tribe or authorized tribal entity, or in Alaska a Native Village or Alaska Regional Native Corporation; a rural community, unincorporated town or village or other public entity. See Section 2 (10), Homeland Security Act of 2002, P.L. 107-296, 116 Stat. 2135 (2002).

A.15 Mitigation: Activities providing a critical foundation in the effort to reduce the loss of life

and/or property from natural and/or human-caused disasters by avoiding or lessening the impact of a disaster and providing value to the public by creating safer communities. Mitigation seeks to fix the cycle of disaster damage, reconstruction, and repeated damage. These activities or actions, in most cases, will have a long-term sustained effect.

A.16 National Incident Management System (NIMS): A system that provides a proactive approach guiding government agencies at all levels, the private sector and nongovernmental organizations to work seamlessly to prepare for, prevent, respond to, recover from, and mitigate the effects of incidents, regardless of cause, size, location or complexity, to reduce the loss of life or property and harm to the environment.

A.17 National Response Framework: Document that establishes a comprehensive, national, all-hazards approach to domestic incident response. It serves as a guide to enable responders at all levels of government and beyond to provide a unified national response to a disaster. It defines the key principles, roles, and structures that organize the way U.S. jurisdictions plan and respond.

A.18 Operational Area (OA): An intermediate level of the state emergency services organization, consisting of SMC and all political subdivisions within the county area. In a state of emergency, the OA shall serve as a link in the system of communications and coordination between the political subdivisions comprising the OA and the Regional Emergency Operations Center (REOC) or State Operations Center (SOC). The **SMC OA** mirrors the County's geographic boundaries.

A.19 Preparedness: Actions that involve a combination of planning, resources, training, as well as exercising and organizing to build, sustain, and improve operational capabilities. Preparedness is the process of identifying the personnel, training, and equipment needed for a wide range of potential incidents, and developing jurisdiction-specific plans for delivering capabilities when needed for an incident.

A.20 Recovery: The development, coordination, and execution of service- and site-restoration plans; the reconstitution of government operations and services; individual, private-sector, nongovernmental and public-assistance programs to provide housing and to promote restoration; long-term care and treatment of affected persons; additional measures for social, political, environmental and economic restoration; evaluation of the incident to identify lessons learned; and post-incident reporting and development of initiatives to mitigate the effects of future incident.

A.21 Resources: Personnel and major items of equipment, supplies, and facilities available or potentially available for assignment to incident operations and for which status is maintained. Under the NIMS, resources are described by kind and type and may be used in operational support or supervisory capacities at an incident or an EOC.

A.22 Response: Immediate actions to save and sustain lives, protect property and the environment, and meet basic human needs. Response also includes the execution of plans and actions to support short-term recovery.

A.23 Standardized Emergency Management System (SEMS): The cornerstone of California’s emergency response system and the fundamental structure for the response phase of emergency management. SEMS is required by the California Emergency Services Act (ESA) for managing multiagency and multijurisdictional responses to emergencies in California. The system unifies all elements of California’s emergency management community into a single integrated system and standardizes key elements. SEMS incorporates the use of the ICS, California Disaster and Civil Defense Master Mutual Aid Agreement (MMAA), the OA concept, and multiagency or inter-agency coordination. State agencies and local governments are required to use SEMS to be eligible for any reimbursement of response-related costs under the state’s disaster assistance program.
