Dear Mike,

Many thanks to you and Denise for taking time to talk to me about my current sewer fees. My fiancé and I live in a modest one story home with a walk out basement. I am charged \$96.04 a month and that is just for sewer. As you know, my water is provided by a well (5/8" d), so the town does not meter our water input. Based on our new water softener, which recharges every 1,000 gallons, we have been using between 1,400 and 1,800 gallons per month since last fall.

I understand that there are three different sewer billing rates. The usage at my home with it being just me and my fiancée falls safely below the 2,000 gallon a month threshold. I would ask the council to reflect this is what I am being charged for my sewer only account.

Please let me know what other details or requests I should make in this letter and what else I need to do.

Thank you for your help.

Tripp Bradford
