6. Description of proposed work:

Shore up the wall parallel to John st on the rear bump out of the structure and remove failing brick wall. The Brick wall that is existing will be rebuilt with the brick one width thick from the original wall and backed up by a cement block wall to stabilize and strengthen the design. All openings will be returned to their existing dimensions and will follow the previously approved elevation for this location. In the event the foundation needs to be repaired it will have the same appearance from the exterior to that of the existing.
