RE: **Planning Board Peer Review Engineer Report**
668-670 Metacom Avenue

A handwritten signature in cursive script, appearing to read "Diane W.", is written diagonally across the right side of the letter.

Attached is the peer review engineering report on the Minor Land Development Application at 668-670 Metacom Avenue.

I want to call your attention to Pare's recommendation on Page 2 of the report regarding conditions. The recommendation is to include a condition prohibiting exterior vehicle service, maintenance, and equipment cleaning; auto fueling; and road salt storage and loading. These uses are considered land uses with higher potential pollutant loads, and would require implementation of additional stormwater management standards.
