NOTICE OF PUBLIC HEARING

PERSUANT TO THE BRISTOL ZONING ORDINANCE

Notice is hereby given by the Zoning Board of Review
that a Public Hearing will be held in-person at:

Bristol Town Hall

10 Court Street, Bristol, RI 02809

Monday, October 5, 2026 at 7:00 p.m.

In regards to the petition of:

Applicant: KEITH JOHNSON

Owner of Record: Keith N. Johnson and Deanne M. Johnson, Trustees

Location: 13 SMITH ST , BRISTOL, RI, 02809

Plat: 133 Lot: 127

Zoning District: R-15

Applicant is requesting a **Special Use Permit** to:

construct an approximate 32ft. x 62ft. single-family dwelling at a height greater than 25 feet above grade in the flood zone

Edward M. Tanner

Principal Planner / Zoning Enforcement Officer

Scanned copies of all applications and supporting materials will be available on the Town of Bristol website at <https://bristol-ri.municodemeetings.com/>. If you have any comments regarding this petition, but are unable to attend, you may submit your comments in writing to the Zoning Board via regular mail addressed to: Zoning Board of Review, Bristol Town Hall, 10 Court Street, Bristol, RI 02809 or via email to etanner@bristolri.gov.

Zoning Board Narrative

13 ½ Smith Street, Bristol, RI

The subject property is a 14,679 square foot lot located on an easement from a private road, known as Kickemuit Anchorage Way. Kickemuit Anchorage Way accesses to Smith Street. There is currently one single family cottage located on the property, used only for personal family use, plus an oversize garage/boat storage building with an extended-roof platform-patio.

We have owned this property for 28 years and during this period have remodeled each room within the cottage, re-roofed it, installed insulation, installed vinyl siding, and new double pane windows. In recent years, the property has become the victim of rising tides, and we have experienced one to two flooding incidents per year, exclusive of tropical storms. I am attaching several pictures of this flooding, which has reached a height of about 3 feet above ground level. One of those pictures also shows marks which I have made on the inside of the garage door which shows the flood level from Hurricane Sandy (2012) and high tide levels in December 2022 and December 2023.

We have explored the potential to raise the current cottage structure and had a design developed by Fagan Design of Newport. Attached you will find their 3-dimensional drawings of the present cottage and their similar drawings for a raised cottage. However, when we consulted with Principe Engineering of Tiverton about the structural issues of raising the cottage, their study indicated that it could not be elevated because it had been constructed at 3 different times, and the additional structures had not been integrated. Therefore, we have concluded that it is necessary to demolish the existing structures on the lot and build a new single-family residence which will be elevated so that the first living floor is 16 feet above mean high tide.

Relief is being requested of the Zoning Board pursuant to SECTION 28-409 (2) and SECTION 28-150 (eee)

A Special Use Permit is requested due to the proposed structure being over 25' in a flood zone. The proposed house will be 35' above the existing mean grade of 5' foot and 33' feet 7 3/8" above the proposed final grade. The design complies with all standards of Section 28-150 (eee) and, we believe, the spirit of the standards in Section 28-150.

(1) The construction will conform to all building code requirements in a flood zone. The lower level will be properly flood vented and engineered per requirements for residences in the AE Zone with limited wave action.

(2) Roof pitches are greater than 4/12 except for the small 3 season room off the dining area and the laundry room, which has a pitch is 3/12. All main roof trusses have a roof pitch of 10/12 or 12/12.

(3) The structure is within all set-back designations which are 20' minimum on all sides.

(4) Building size is as follows:

Lot Size: 14,679 sf

Proposed Footprint:

Foundation Area: 1,364 sf

1st Floor Living Area: 1,772 sf

2nd Floor Living Area: 1,060 sf

2nd Floor Ratio to 1st Floor Living Area: 59.8%

Deck Area w/o stairs: 456 sf = 16.1% of Living Area on Floors 1 & 2

The Lower level has an elevated front-door room (522 sf) for a stairway, lift, and slider access to the patio. If this room is included as Living Space, the 456 sf of deck equals 13.6% of Living Areas. This is a single deck, which overlooks the Kickemuit and not any adjoining residences. properties.

A key concern is whether or not this Special Use request will change the nature of the Smith Street neighborhood. We do not think this will be the case, for the following reasons:

- The closest point on the structure is approximately 160' from Smith Street.
- Adjacent to Smith Street is a tall evergreen hedge which is approximately 20' tall. See the attached photo. Just beyond the evergreen hedge is a large weeping willow tree which further blocks any sight line in the direction of the proposed structure.
- The adjoining property, to the East, is the Kickemuit River. See photo

- The adjoining property to the North is Common Land of the Anchorage Court Association which is used for boat storage and access to their dock. Beyond this is protected wetland and the Kickemuit. See photo
- The adjoining property to the West is common land of the Anchorage Court Association which is used for boat and boat trailer storage. A high hedge and trees separate this lot from that property. See Photo
- The adjoining property to the South (33 Smith Street) is owned by the same family trust which owns this property.
- There is one neighboring structure to the South/East which is Lot # (51 Smith Street). This is an elevated house with the first living floor at least 10' above ground level. It does not meet the present Code Standards because it has equal areas on the 1st and 2nd living levels. Several pictures of this house are attached.
- The adjacent house to the east is 53 Smith Street. It is also an elevated structure with the 1st living floor at least 8' above ground level. See attached pictures of this structure. Elevated structures are common to the immediate neighborhood.

1. SECTION 28-409 1(c) Dimensional Variance

- That the hardship from which the applicant seeks relief is due to the unique characteristics of the subject land or structure and not to the general characteristics of the surrounding area, and not due to an economic disability of the applicant.* Because the existing grade is far below BFE, the house needs to be raised significantly to comply with FEMA flood zone requirements and the recommended added freeboard per CRMC.
- That such hardship is not the result of any prior action of the applicant.* The existing property presents this hardship, and the existing dwelling needs to be replaced as it is in disrepair and well below BFE.
- That the granting of the requested variance will not alter the general characteristic of the surrounding area or impair the intent or purpose of this chapter or the comprehensive plan of the town.* In contrast, this design has deep eaves and a street side articulation that maintains the spirit of the provision. SEE VARIOUS PHOTOS ATTACHED as evidence of "character" of surrounding properties.

2. In granting a dimensional variance, that the hardship that will be suffered by the owner of the subject property if the dimensional variance is not granted shall amount to more than a mere inconvenience, meaning that relief sought is minimal to a reasonable enjoyment of the permitted use to which the property is proposed to be devoted. The fact that a use may be more profitable or that a structure may be more valuable after the relief is granted shall not be grounds for relief.

The primary motivation of the Project although it will enhance the property value is to make the property more functional and comply with current codes related to flood hazard zones. The current structure is not compliant with FEMA regulations.

The above Dimensional Variance discussion is in the event the Board discerns a need for a Dimensional Variance such as height of the structure.
