Lincoln, RI 02865

Re: Approval of Solar System, Bristol Landfill

Dear Mr. Richtarik

The Office of Land Revitalization & Sustainable Materials Management (LR&SMM) is in receipt of your revised engineering report dated March 1, 2023, related to the proposed solar system.

The department's review has determined that the submitted report has substantially met the criteria cited in Rule 2.1.9 J of Solid Waste regulation #2.

The Department herein has approved the Modification plan providing that all activities shall adhere to this report and applicable requirements of the previously approved post closure program. Any minor changes shall be reported to our Office within (5) business days.

The Town of Bristol and NuGen Capital Management, LLC shall jointly be responsible to undertake the necessary repairs, modifications and replacement of maintenance items during construction such as but not limited to, broken gas vents, erosion on the northern and western slopes, removal of brush growth on the landfill footprint. Only equipment with low pressure allowed on the landfill so as to protect the integrity of the liner. At any time. If there are objectionable odors emanated from the landfill, then the Town shall take the necessary measures to eliminate or mitigate the emitted gas odor.

This approval does not relieve the Town of Bristol from obtaining any other necessary permits from state and/or federal agencies.

If you have any questions, please feel free to contact Walid Ali or me at 222-2797 or email me at Mark.Dennen@DEM.RI.Gov

Sincerely,

Walid Ali, Environmental Engineer III  
Office of Land Revitalization and Sustainable Materials Management
