Work Category:	Remodeling of Structure(s)

Description of proposed work:

We previously received HDC approval for the construction of a pool house, pool, and other associated amenities just east of the main house on our property. Instead of this plan, we would like to remodel the circa 2001 horse barn on the property for use as a pool house. We would not change the footprint of the exiting barn, and the only exterior changes under consideration would be the replacement of the barn doors to glass doors, and enlargement of the existing windows.

As part of this project, we also propose to move the location of the previously approved pool from the location just east of the house, to a location east of the existing horse and goat barns, with similar hardscaping as the previous approved design.
