SUBJECT: Ordinance Change to Chapter 8 Boats, Docks and Waterways

I am proposing several modifications to the Harbor Ordinance to improve operational clarity and efficiency. The primary modifications include:

1. **Date Adjustments** – Updating ordinance timelines to better align with seasonal and operational requirements.
2. **Electronic Billing** – Adding language to specify that billing will be sent via email, streamlining communication and reducing paper usage.
3. **Mooring Inspections** – Revising procedures and schedules related to mooring inspections to ensure compliance and safety.
4. **Waiting Lists** – Enhancing language concerning the management and prioritization of waiting lists for mooring allocations.
5. **Commercial Mooring Permits** – Clarifying requirements and processes related to commercial mooring permits.

These proposed changes aim to improve efficiency, support sustainable practices, and ensure clear guidelines for harbor operations. Please feel free to reach out for further details or discussion.
