

Construction Notice

What:

BCWA purchased the property located at the corner of Hope St. and Tupelo St. in Bristol. This property abuts a BCWA tank site and was identified as an ideal location to support the construction of a pump station.

Why:

As part of the BCWA capital improvement program, the BCWA will be building a new pump station to expand the higher-pressure zone into more of the areas in Bristol that are experiencing low pressure due to elevation. The adjacent tank will provide a supply to the pump station to support the substantial demand for fire flow. BCWA, working with PARE Corporation of Lincoln, RI, has awarded the construction to RP Iannuccillo & Sons Construction of Providence, RI. The project budget is \$3,250,000, which includes the new pump station, improvements to the tank site, and landscaping.

Next steps:

We anticipate groundbreaking to be in December, with ongoing work on the new building to continue throughout the winter and through the 2022 construction season. As part of the required work you will see construction activity at the site, trucks, equipment and construction related noise. These are temporary inconveniences that will lead to the improvement of the pressure in the system. We thank you for your patience while we continue to work to upgrade the water system.

Please contact BCWA Engineering with any questions: 401-245-2022.

Thank you for your cooperation during our improvement projects.
