NOTE

Previous experience and performance may be a factor in making the award.

The Johnny MAX+

Self-Propelled Handler
with Articulating Boom

Key Features

Position in any direction – no need to be exactly 90° to the plot. The boom swings approximately five feet left and right, making it easy to set monuments, vaults, or HVAC units. Capable of lifting from ground level to around 11 feet of hook height, the boom allows for efficient unloading of vaults and monuments directly from trucks. The articulating design is perfect for monument restoration and re-setting tasks.
