Re: Planned electrical distribution improvements within proximity of Parcel 11-58-0034-0003-00-4, 818 TERRE COUPE RD, BUCHANAN MI 49107 **Ref: WR77613185**

Dear City of Buchanan,

Thank you for being a loyal electrical customer. We are grateful for your continued business. Our mission is to improve safety, reliability, and customer satisfaction.

In keeping with these core objectives, Indiana Michigan Power Company is planning to improve the electrical distribution lines in your area.

We are excited to invest in upgrades that will improve safety and reliability for you and your community. Specifically, we are working to relocate the electrical lines to the roadside. Our goal is to decrease power outages, make restoration quicker, and reduce disturbance to your property for tree trimming and line maintenance in the future.

In the coming weeks, you may see our representatives in your area inspecting conditions and determining options for the best route. When possible, facilities will be installed within road right of way. If conditions require an easement or tree trimming on your property, you will be contacted directly. Please rest assured that we will NOT perform any tree work on your property until we contact you first. If you are not present a door card will be left and/or mailed. If tree trimming is being considered, we will mark the trees with a temporary paint to create a visual for our discussions with you.

It is our intent to work in cooperation with you to minimize disruption and inconvenience. If you have any concerns after you have been contacted, please call one of the following numbers:

Easements and Right of Way	Carl Meyer, Michiana Land Services	269.208.0155
Tree trimming	Brian Gerdes, I&M Power Co.	269.695.1733
Engineering Design	Bryan Steury, Spectrum Engineering	260.627.8888

Very truly,

Indiana Michigan Power Company
