

Memorandum

Date: March 3, 2026

To: Downtown Design Review Committee

From: Kristen Gundersen, Planning and Community Development Director

Subject: **108 W Front Street – Proposed changes – Replace front access door, replace side window, remove rear window and install overhead door access, install new signage on front of building**

Background

The one-story brick commercial building located at 108 W Front Street is in the D Downtown District. The irregularly shaped parcel was purchased by 2nd and Main Inc in September 2025. The agent for the corporation is the property owner listed in the application. The property owner approached the City Commission regarding a boundary adjustment to create a rectangular parcel rather than a flag lot. On March 23, 2026, the City Commission agreed to the boundary adjustment which will allow the creation of an outdoor patio at the rear of the building.

A building permit for the interior remodel of the existing building was issued in December 2025. The permit allows for the remodel and rehabilitation of the building from office space to food service. Work has been taking place at the property since the building permit was issued.

While working on the building additional changes are now being proposed. With the exception on the signage request, city staff cannot administratively approve the requests per Section 71-36.H.2 of the Unified Development Code (UDC) adopted in late 2025. The applicant has completed the required application which includes the standards for review. Following is a brief description of the proposed changes:

1. Western elevation (facing post office) - removal and replacement of an existing window;
2. North elevation (rear) - removal of an existing window and installation of an overhead door; replacement of an existing access door and removal of enclosed window space with new window and installation of a deck/patio and ADA ramp;
3. North elevation (rear) - installation of an open, unenclosed patio at the rear of the building;
4. Southern elevation (front) - removal and replacement of the existing access door;
5. Painting of exterior of building;
6. Installation of exterior wall sign facing West Front Street. Based on Sections 71-36.G.2.a, b, and d city staff can approve the signage request and have suggested improved exhibits be provided clearly showing the signage will not cover the brick detail work associated with the recessed area located above the windows.

Standards for Review

Section 71-36.H of the Unified Development Code does not specifically state the standards for review by the Committee. There is a reference to the Downtown Design Standards. This document was adopted by the City Commission in December 2007. While preparing the application, staff incorporated the seven points associated with building design in addition to the five criteria that staff can review for administrative approval. The Secretary of the Interior's Standards for Rehabilitation ten points were not incorporated into the application.

For this meeting, staff have attached the 2007 Design Review Standards along with the Section 71-36.H of the Unified Development Code for review.

Please note the 2007 Design Review Standards references changes to the previous Zoning Ordinance and the C-3 Central Business District. This language is no longer valid. The C-3 District is now called the D Downtown District and there were no changes to the boundaries. Going forward, the language found in the UDC is followed until it is modified by public hearing before the Planning Commission with recommendation made to the City Commission and adoption of an amending ordinance and two public hearings.

With the adoption of the Unified Development Code, the vote of the Committee is not forwarded to the Planning Commission for final action. However, the UDC does not reference an appeal process.

Action

Have the applicant review the application, ask questions and deliberate the request while reviewing the 2007 Design Review Standard before making a motion can be made and voted on. If necessary, each individual request can be voted on separately.

2005-2007

City of Buchanan, Michigan
Downtown Business District
Building Design Standards

Definitions

- A. *Appearance*. The outward aspect of a building structure or site visible to the public.
- B. *Appropriate*. Sympathetic, or fitting, to the context of the site and the whole community.
- C. *Appurtenances*. The visible, functional objects accessory to and part of the building.
- D. *Architectural concept*. The basic aesthetic idea of a building or group of buildings or structures, including the site and landscape development, which produces the architectural character.
- E. *Architectural feature*. A prominent or significant part or element of a building, structure, or site.
- F. *Architectural style*. The characteristic form and detail, as of buildings of a particular historic period.
- G. *Central Business District*. The area designated on the adopted Buchanan Master Plan as the Central Business District.
- H. *Character*. The combination of traits which, when considered together, distinguish specified land and/or development from other specified land and/or development. In assessing character, the following may be considered, along with any other expressly identified factors:
 - i. Percentage of a lot(s) covered by structures and other impervious improvements
 - ii. Type or style of structure(s)
 - iii. Traffic flow and pattern, and the relationship of traffic to pedestrian and vehicular thoroughfares
 - iv. Density of land use
 - v. Intensity of uses
- I. *External design feature*. The general arrangement of any portion of a building, sign, landscaping, or structure and including the kind, color, and texture of the materials of such portion and the types of roof, windows, doors, lights, attached or ground signs, or other fixtures appurtenant to such portions, as will be open to public view from any street, place, or way.
- J. *Fenestration*. The arrangement of windows and doors in a building.
- K. *Graphic element*. A letter, illustration, symbol, figure, insignia, or other device employed to express and illustrate a message or part thereof.

Design Guidelines

Goals:

- Preserve and protect existing historical structures
- Preserve, protect, and reinforce the context of historic structures and land development patterns within the Downtown District by encouraging design, construction, and maintenance of all new buildings, additions, additions, and alterations to be in harmony with the character of existing historic architecture.
- Encourage new buildings that, while reflecting the traditions and character of historic buildings, are in themselves high quality designs which harmonize without imitating an earlier style or period.
- Protect and enhance historic areas to attract residents and visitors and to serve as a support and stimulus to business and civic pride.
- Insure that when rehabilitating a building, the property is returned to a state of utility through repair or alteration, which makes possible an efficient use, while preserving those portions and features of the property which are significant to its historic, architectural, and cultural values. The Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings shall form the basis for review of proposed projects in the Downtown District.
- Assist applicants by providing design guidelines and advice on general historic preservation approaches.

Expectations:

Façade improvements will generally meet the recommended architectural improvements as outlined in the 1992 Downtown Development Plan (Camiros).

Architecture:

- Different architectural styles are encouraged. Any style should be complimentary to its surroundings.
- Architectural styles must be harmonious with existing architecture and respect the period of architecture representing the development of the City of Buchanan.
- Architectural styles preceding establishment of the buildings in Buchanan shall be discouraged.

Massing:

- Façade proportions (ratio of width to height) should be similar to those of surrounding buildings.
- Large structures shall be developed using varied masses to create the appearance and character of smaller pedestrian-oriented structures.
- Massing of new or additions to existing structures shall not be disproportional to adjacent structures or the majority of structures on the same block.

Roofs:

- Various types of roof forms are encouraged. Roof shapes shall be respectful of adjacent structures and not detract from or infringe upon significant features of existing properties.
- Generally visible roof materials should give the appearance of seam metal, slate shingle, tile shingle, architecturally dimensioned fiberglass shingle, or painted corrugated metal.

Materials:

- Materials and use of materials should be compatible with those used in adjacent structures as applicable. Integration of individual details and the design as a whole is encouraged.
- Materials should give the appearance of brick, stucco, tile, and various stones if appropriate to the style of the structure.
- Materials that give the appearance of vinyl siding, aluminum siding, plywood, pressboard siding, corrugated metal, and concrete masonry without an applied finish are generally inappropriate for downtown Buchanan.

Doors and Windows:

- Where appropriate, existing doors and window openings shall be retained. New openings in existing structures shall be proportional to established patterns of fenestration. If closure of existing openings is necessary, such work shall be accomplished without creating a major detraction from the original appearance of the building.
- Height to width ratios of openings should be harmonious with the neighboring structures.
- The pattern established by the relationship of openings and surrounding wall area should respect the neighboring structures. The percentage of glass to wall should approximate that of neighboring structures.
- Replacement windows and doors should fit existing openings and be consistent with existing trim and other features of the structure. Replacements should duplicate the appearance of the original with respect to design, size, proportion, reflective qualities, and profile.
- Windows and doors which have mullions should be of true divided light or equivalent, as opposed to snap-on.
- Glass should be clear or lightly tinted, allowing for two-way visibility.

Signs and Awnings:

- Signs and awnings shall comply with the City of Buchanan Sign Ordinance.
- Signage shall not detract from, destroy, or obscure the significance of prominent architectural features of buildings within the district.

Demolition:

- Approval of projects involving demolition shall give consideration to the contribution of the structure or parts of the structure to its immediate surroundings and to the overall character of the district, the historical importance of the building, and the building's structural condition. Demolition in part or whole shall be permitted if the demolition does not detract from the district, the structure is a hazard to the public health, safety, or welfare and is beyond repair, or the economic feasibility of repair is extreme. Documentation of economic feasibility shall be clearly illustrated in the application for review.

The Secretary of the Interior's Standards for Rehabilitation

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
3. Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.
4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a property shall be preserved.
6. Distinctive historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.
7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials should not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
8. Significant archaeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment be unimpaired.

ARTICLE XI

C – 3 CENTRAL BUSINESS DISTRICT

Section 11.04 – Alteration, Site, and Façade Plan Required

- A. Prior to any exterior aesthetic or cosmetic alteration (siding, paint, windows, or any exterior work that does not require a building permit) on any building located in the C-3 Central Business District, the building owner or occupant must obtain a Zoning Compliance Permit from the Zoning Administrator. The zoning Compliance Permit application shall include a building façade plan pursuant to Article XXII, Section 22.03. The plan must contain schematics and photos or drawn rendering of the proposed alterations with applicable color sample attached. The Design Review Committee will determine if the applicant's plan conforms to the approved Downtown Design Standards. If not, the applicant will be required to amend the plan and resubmit the plan approval by the Design Review Committee. Failure to comply with the Downtown Design Standards will result in rejection of the applicant's plan and any alteration will be prohibited.

- B. Prior to the issuance of a building permit in the C-3 Central Business District for any new construction or for the remodeling of any existing building or structure which will involve the exterior façade or other exterior surface in any way, the Zoning Administrator shall cause the application including a site and a façade plan prepared pursuant to the provision of Article XXII, Section 22.05 to be submitted to the Design Review Committee for review and determination of compliance with the approved Downtown Design Standards for the Central Business District. The Design Review Committee shall notify the applicant concerning any features and colors inconsistent with the approved standards. Any proposed new construction or remodeling of any existing buildings found to be inconsistent with the standards for the district by the Design Review Committee shall be disqualified for any incentive offered by the City or Downtown Development Authority. The applicant's proposal shall be rejected and no building permit issued until the site and façade plan are in conformance with the approved Downtown Design Standards and the plan approved by the Design Review Committee and the Plan Commission.

Approved by Plan Commission 11-13-2007
Approved by City Commission 12-10-2007

Downtown Design Review Application

Please print legibly. All portions must be completed. Do not leave any section blank, use N/A. Incomplete forms will be returned. If additional space is needed, please use additional sheets of paper. Return to the Planning and Community Development at City Hall.

Property Information

Property Address: 108 West Front Street

Tenant Name: Dustin Jankoviak

Property Code Number(s) (Tax Number): 11-58-7250-0003-01-5

Description of proposed work: -Install Signage front of building

-Painting of building exterior

-Rear "clearview" overhead door 8 x 10

-Replace both exterior door units with energy efficient 36" wide

-Install updated energy efficient windows

Applicant Information

In case the applicant is not the property owner, written permission from the property owner is required.

Building Design Standards – Downtown Design Standards 2007

Prior to answering the following statements, please review the Downtown Design Standards document dated 2005 – 2007 consisting of definitions, design guideline goals and expectations, seven key design categories and the Secretary of the Interior’s Standards for Rehabilitation.

In some instances, the categories may not apply, please why the statement does not apply, for example “no change to the existing roof line.”

If additional written comments are needed, please use additional sheets of paper.

1. Architecture: Explain how the design is complimentary, harmonious and respects the period architecture.

The architectural changes/modifications are more in an effort to afford
easier accessibility than actually changing the look or historic value of
the building. The doors will be in like kind to what we see in many of
the historic downtown buildings in Buchanan. Single LOW E glass panel with
proporunate rail and style dimensions, with larger lower rail.

2. Massing: Explain how the modified or new façade proportions have been designed to be similar to surrounding buildings.

This building is in close proximity to a variety of buildings. Including the Ross Sanders House, Post office, ATT building, and the old teen center building. Painted brick, natural brick and stone, warehouse style buildings as well as some residential.

3. Roofs: Explain how the roof is respectful of adjacent buildings and does not detract from the building.

NA

4. Materials. Explain and provide detailed information regarding exterior façade materials. Materials having the appearance of aluminum, pressboard or vinyl siding, plywood, concrete masonry without an applied finish are generally inappropriate.

Black painted aluminum frame doors, rot resistant jambs...historic in appearance, size and scale. Clear view black aluminum frame overhead door Steel and masonry opening...Anderson 400 series replacement windows aluminum clad exterior, wood painted interiors.

5. Doors and Windows. Explain how new openings are proportional and harmonious with the surrounding buildings. Replacement of doors and windows should maintain original opening size and be consistent with original material found on the building at time of construction.

New Door openings are proposed to be widened to 36" keeping the original historic heights and widths in brick. Overhead door at rear will serve as an access point to a future deck/patio as well as to get larger equipment into the building. (Non-Primary facade)

6. Signs and Awnings. Explain how the sign or awning comply with the regulations found in the Unified Development Ordinance (zoning ordinance) and do not detract from significant architectural details on the building.

Pre-existing awning has been removed, and a sign is being proposed to be added to the architectural brick embellishments just above the historic transom glass.

7. Demolition. Explain why the building or a portion of the building needs to be demolished.

Demolition that has occurred and brick repair has been in an effort to
further preserve the historic qualities of the building.

Administrative Approvals. Section 71-36.H Downtown Applications. If the following criteria are met, city staff may approve the request.

- H.2.a The work does not involve the addition or removal of architectural features that define the character of the building, including but not limited to cornices, transoms, storefront configurations, or decorative masonry.

All decorative masonry to remain including transom details, we would be
adding a transom back in above rear door that has been boarded shut.

Wall mounted AC unit to be removed and window opened back up east of doorway
Overhead door located to the west closest to the PO

- b. The work is consistent with the City of Buchanan Downtown Design Standards, including any applicable design guidance or previously issued staff interpretations.

Original brick openings and have been preserved, where necessary lintels
will be repaired/replaced

- c. The work is located on a non-primary façade or is minimally visible from the public right-of-way, unless the proposed materials and design match the existing conditions.

Rear exit door, replacement windows and overhead door (non primary facade)

The proposed windows for the west side facing PO as well as the rear have
previously approved for other historic buildings downtown. 201 East Front

Second story rectangular Anderson 400 series windows&consistent in size
and scale to the original historic windows.

d. The work is limited to repainting, signage, awning replacement, lighting, window or door replacement of the same size and material, or similar minor treatments.

With exception of the overhead door, and the double window that is currently boarded shut, all other openings for windows/doors will remain the same without masonry/cosmetic modification

e. The proposal does not require interpretation of discretionary design guidance or involve requests for exception to adopted standards.

There are no design changes to primary facade, the changes at rear do not require interpretation of discretionary design guidance

Supplemental Information

Site Plan. Required if expanding the existing or decreasing the overall square footage of the building or adding an awning, information drawn to scale and with dimensions, containing the following information:

- a. North arrow identified.
- b. Property lines or boundaries of the parcel in question.
- c. Footprint of the existing and/or proposed building with distances to parcel lot lines.
- d. Show all other major property improvements which could affect the design such as parking lots, driveways, landscape area, signage or awnings. There is a thirty (30) foot clear site line for items more than 30" in above grade as measured by the intersection of the streets and line drawing between the two street lines. See Figure 71-B Clear Site Lines of the Unified Development Ordinance.
- e. Show location and description of any easements located on the property.

Exterior Facade Drawings must be drawn to scale with dimensions, containing the following:

- a. Show the dimensions of the width and height of the building on facades visible.
- b. Show existing and proposed improvements to visible facades.
- c. Show the dimensions of existing and proposed windows and doors.
- d. Show the dimensions from grade to the top of all signs.
- e. Show placement of any proposed signage and/or exterior lighting with distances from ground to bottom of improvement and overall height of improvement.
- f. For new or expanded buildings include the outline and window placement of adjacent buildings where changes are taking place.
- g. Include photographs of the adjacent buildings.
- h. Include accurate information regarding proposed colors to be used.
- i. Superimpose the proposed improvements onto the building

Downtown Design Review Application Certification

The Applicant certifies and acknowledges and agrees that:

- A. The statements contained in this application are true and correct to the best of the Applicant's knowledge and belief. The owner of the subject property, if different from the applicant, states that they consent to the filing of the application and that all information contained is true and correct to the best of their knowledge;
- B. The Applicant understands that an incomplete or nonconforming application will not be considered. In addition, the Applicant understands that the City may require additional information prior to the consideration of this application;
- C. The Applicant shall make the property that is subject of this application available for inspection by the City at reasonable times;
- D. If any information provided in this application changes or becomes incomplete or inapplicable for any reason following submission of this application, the Applicant shall submit a supplemental application or other acceptable written statement containing the new or corrected information as soon as practicable but not less than twenty (20) days following the change, and failure to do so shall be grounds for denial of the application;
- E. The Applicant understands that when the application is approved with conditions, those conditions will need to be met as part of any permit issued; and
- F. The Applicant understands that they responsible for all application fees. Fees are non-refundable and there is no guarantee the application will be approved or permits issued. There should be no outstanding monies owed to the City (i.e., water bill or taxes).

On the 09 day of March, 2026, I/We have read the above certification, understand it, and agree to abide by its conditions.

Signage:

Brick & Bloom (back lit lettering in a steel finish) There are architectural details above the window transoms that we would like to accentuate. Placing the signage inside the picture frame details laid out in the brick pattern would keep the aesthetic of the intended purpose of the design. The rendering shows the graphic slightly larger than what it will actually be. The openings in the larger two frames are approx. 22" x 92" and the middle measures 22" x 48" we would land under those dimensions to fit proportionately inside those parameters. All lettering to be fastened using a rail system anchored to brick mortar joints.

Exterior Paint:

In effort to further the brand and add some eye-catching detail to this building, we are requesting the permission to paint the exterior brick. The exceptions being historic limestone copings to remain as-is at South facing building front as well as all the copper detail and framing at original store front windows. The charcoal steel copings will also remain. There have been many repairs through the years, with a mixture of brick materials, tuck-pointing styles and mortar finishes. Paint would unify and help tremendously with the desire to draw in business and establish a new and attractive look for this building.

Rear Overhead Door:

In place of deteriorating brick and a damaged window unit we are proposing the upgrade to a clear view overhead door with black trim. This door would serve as a multi-purpose unit not only allowing for an "open feel" on fair weather days but also ease of bringing in equipment and certain deliveries for day-to-day business operations. A future hope for this space will include a concrete patio with ADA ramp and a hardscape connecting to the sidewalk at the city park next door.

[108 W. Front St.]

The new Michigan Bell Telephone company building which C. F. Pears is erecting is rapidly nearing completion. The walls and roofs are up, and the floors, plastering and window frames in.

[106 W. Front St.]

Mrs. M. M. Siraganian announces
an auction sale of millinery, store
fixtures and household goods at
the new Pears building on Front
street, Friday afternoon and Satur-
day all day.

[106 W. Front St.]

THE SPARTONS ARE HERE!

Opening Saturday, Aug. 20

*At Our New Location, 106 W. Front Street
In the New Pears Building*

New 928 Models of Sparton Radio on display. Price range to suit everyone. Beautiful cabinet work.

Battery Sets

Six tubes. Dial calibrated in wave lengths. Exceptional selectivity.

Music you feel, as well as hear. You critics who have been waiting for radio that is true to the ideals of musical art—here it is!

Let us demonstrate this amazingly different instrument.

Electric Sets

No A Batteries—No B Batteries—No C Batteries—No Trouble.

Just plug in—take your power from the light socket and enjoy freedom from batteries, eliminators and chargers.

But more! In addition to having this convenience listen to the richest, clearest, most delightful reception that radio science has yet achieved.

Come in and listen to radio at its best, or ask for a demonstration in your own home. We believe you'll agree that the Sparton is an instrument without equal.

Don't forget our address, 106 W. Front street new Pears Building, in show rooms of DePoy Motor Co.

C. L. HOUSWERTH
